- 3 ...
- 4 ...

Discovering Tut: the ^{long story of events} Saga Continues **A.R. Williams**

^{Tut} He was just a ³³⁰⁰ teenager when he died. The last heir of a powerful family that had ruled Egypt and its empire for centuries, he was ^{Buried after death} laid to rest ^{loaded} laden with gold and eventually forgotten. Since the discovery of his tomb in 1922, the modern world has ^{guessed without proof} speculated about what happened to him, with murder being the most extreme possibility. Now, leaving his tomb for the first time in almost ²⁰⁰⁵ 80 years, Tut has undergone a CT scan that offers new clues about his life and death - and provides ^{exact} precise data for an accurate forensic reconstruction of the boyish pharaoh. ^{9 ruler}

Forensic: Scientific tests to investigate crimes

Reconstruction: Process of reconstruction of the face and body bases on the information in the city scan

Pharaoh: A ruler in ancient Egypt

Related to Scientific Investigation
 Rebuilding

Discovering Tut: the Saga Continues *A.R. Williams*

An angry wind stirred up ghostly dust devils as King Tut was taken from his resting place in the ancient Egyptian cemetery known as the Valley of the Kings*. Dark-bellied clouds had scudded across the desert sky all day and now were veiling the stars in casket grey. It was 6 p.m. on 5 January 2005. The world's most famous mummy glided head first into a CT scanner brought here to probe the lingering medical mysteries of this little understood young ruler who died more than 3,300 years ago.

Stirred up: moved, risen up

Ghostly: eerie and unnatural

Dark-bellied: dark in colour

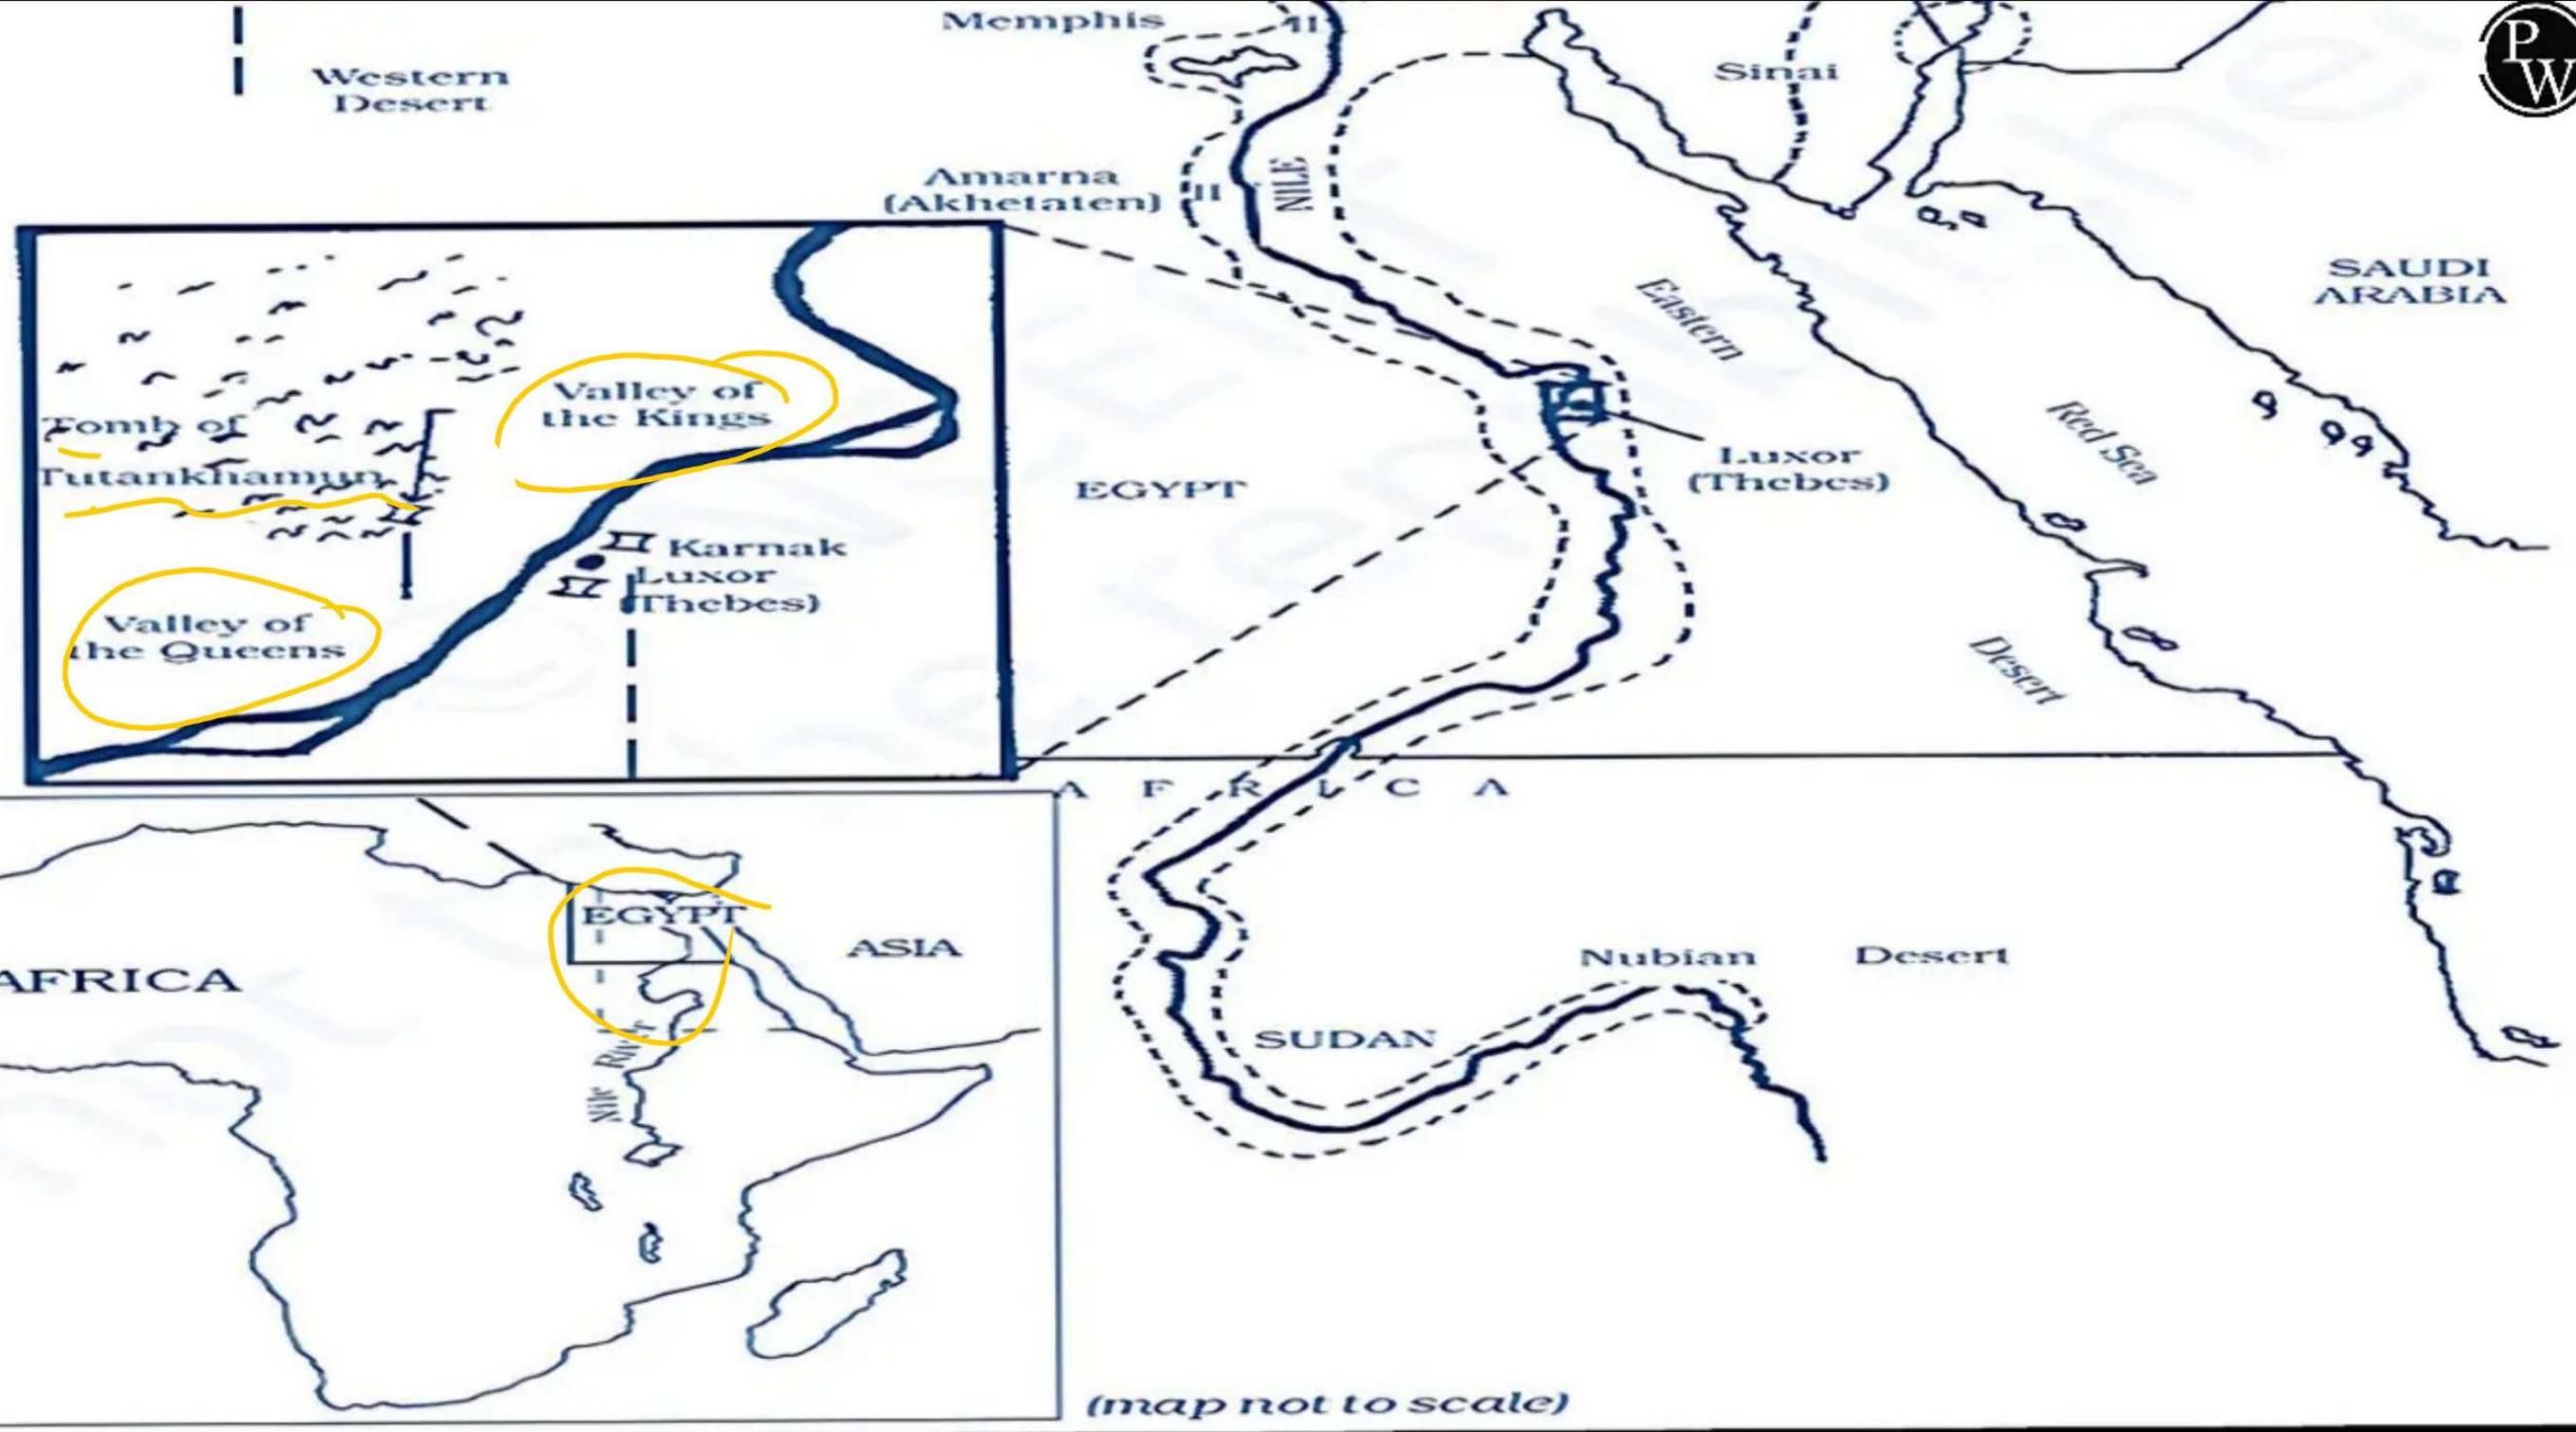

Scudded across: to move quickly

Veiling: covering

Glided: quite, to move without making noise

Probe: to investigate

Lingering: long lasting

Discovering Tut: the Saga Continues *A.R. Williams*

All afternoon the usual line of tourists from around the world had ^{went down} descended into the ^{very small, high} cramped, rock-cut tomb some 26 feet underground to pay their respects. They ^{looked} gazed at the ^{art works} murals on the walls of the burial chamber and peered at Tut's ^{covered with gold} gilded face, the most striking feature of his mummy-shaped outer coffin lid. Some visitors read from guidebooks in a whisper. Others stood silently, perhaps pondering Tut's untimely death in his late teens, or wondering with a shiver if the pharaoh's curse death or misfortune falling upon those who disturbed him was really true.

Descended: move downwards

Cramped: very small

Murals: painting, art work

Gilded: Gold-coated

QUESTION

When was Tut's tomb discovered?

1 1922 ✓

2 1935

3 1905

4 1918

QUESTION

What modern technology was used to examine Tut's mummy in 2005?

- 1 DNA testing
- 2 CT Scan
- 3 MRI
- 4 X-Ray

QUESTION

Why was a CT scan done on Tut's body?

- 1 To determine the cause of his death
- 2 To reconstruct his face
- 3 To find hidden treasures
- 4 To preserve his body
