

BAAZ JKBOSE

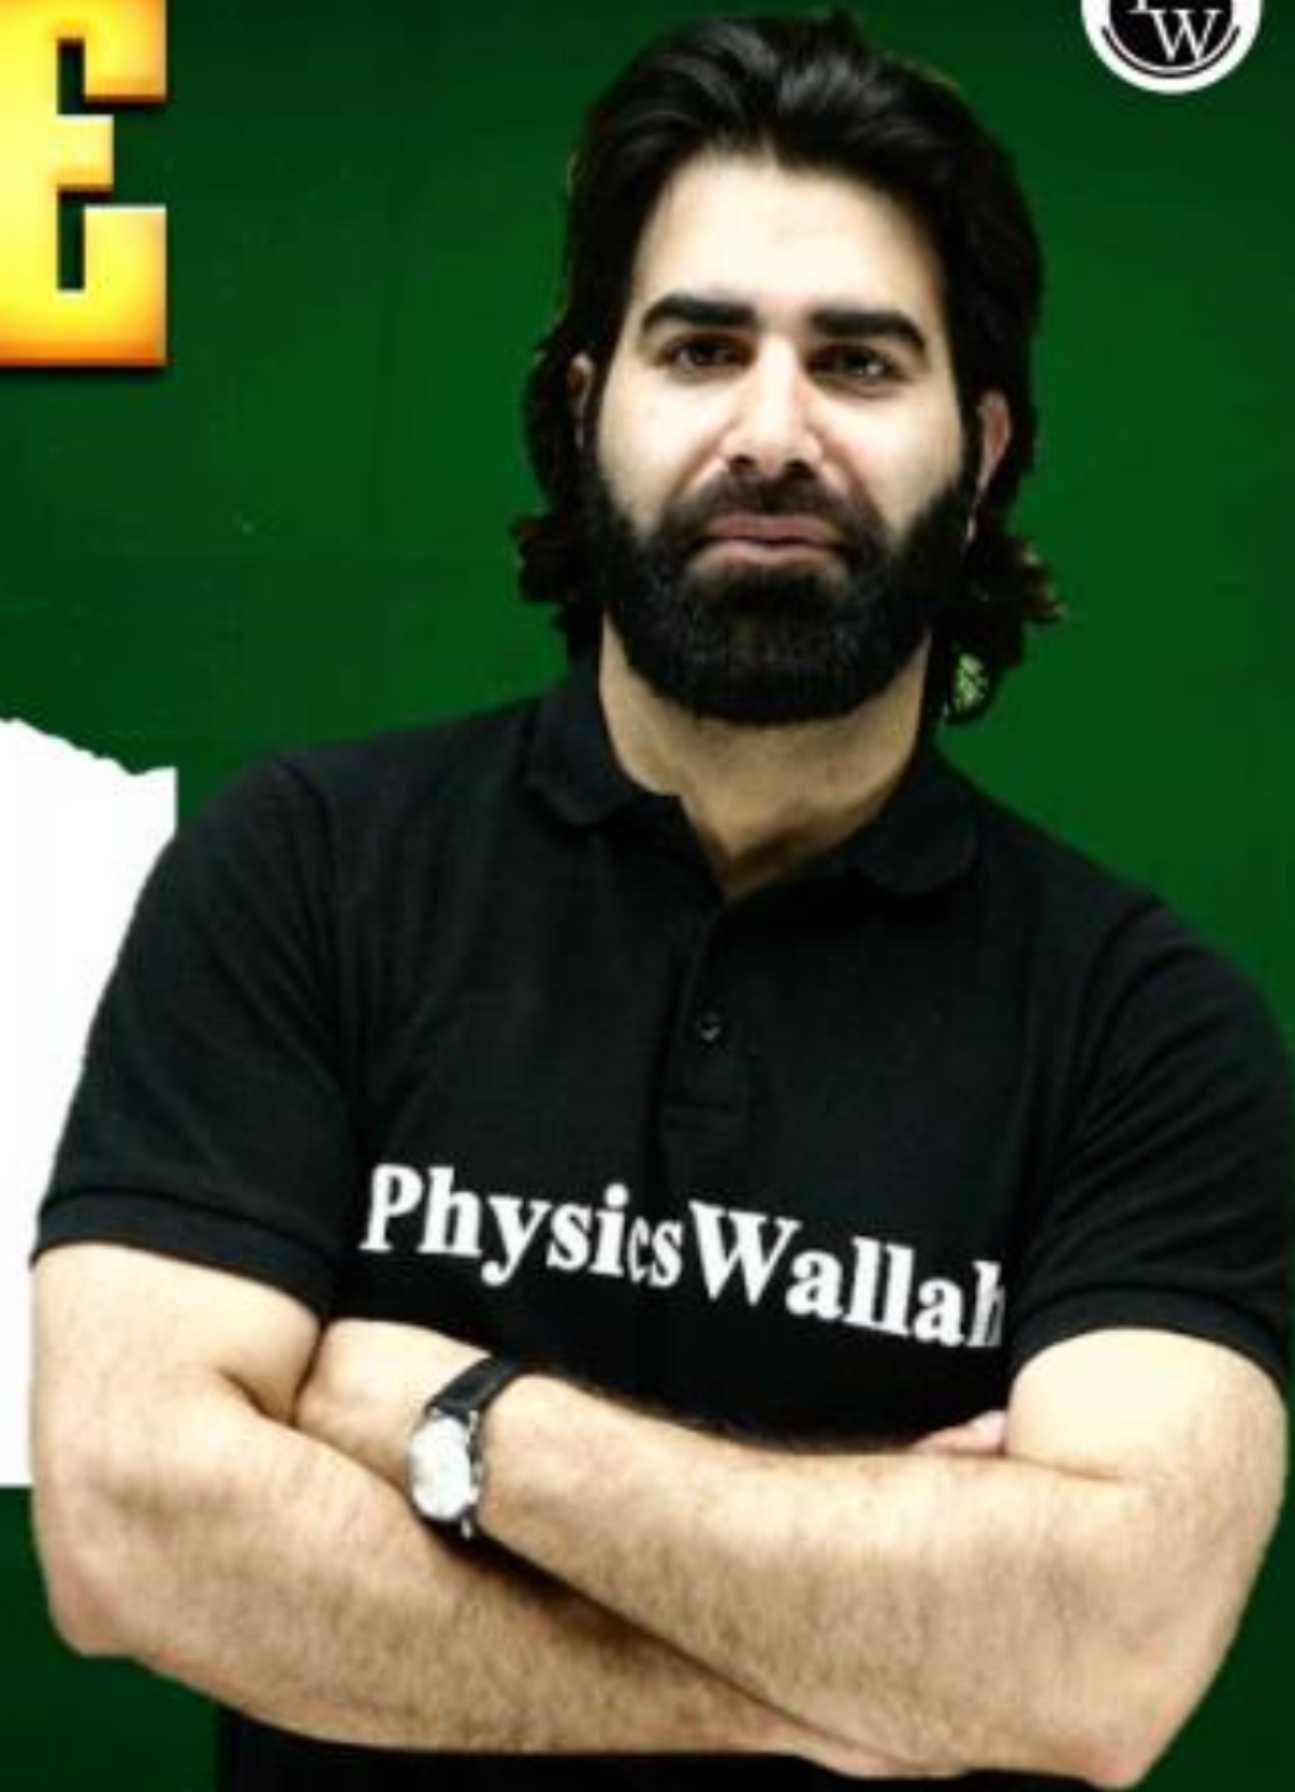

2026 CLASS-11TH

Nueral Control and
Coordination

LECTURE-4

Zoology

Dr Adil Altaf sir

Topics To Be Covered

1

Human Nervous System

→ Cerebrum - gt is Done Bro

Fore Brain (continued)

- ↳ ② Diencephalon - It is Beneath the Cerebrum
- It contains 3rd ventricle

- Roof of Diencephalon - Epithalamus.
- To it pineal gland is attached.

- Wall of " - Thalamus (Acts as Coordinator).
- Major Coordinating Centre for Motor and Sensory Signals.
[For Cerebrum]

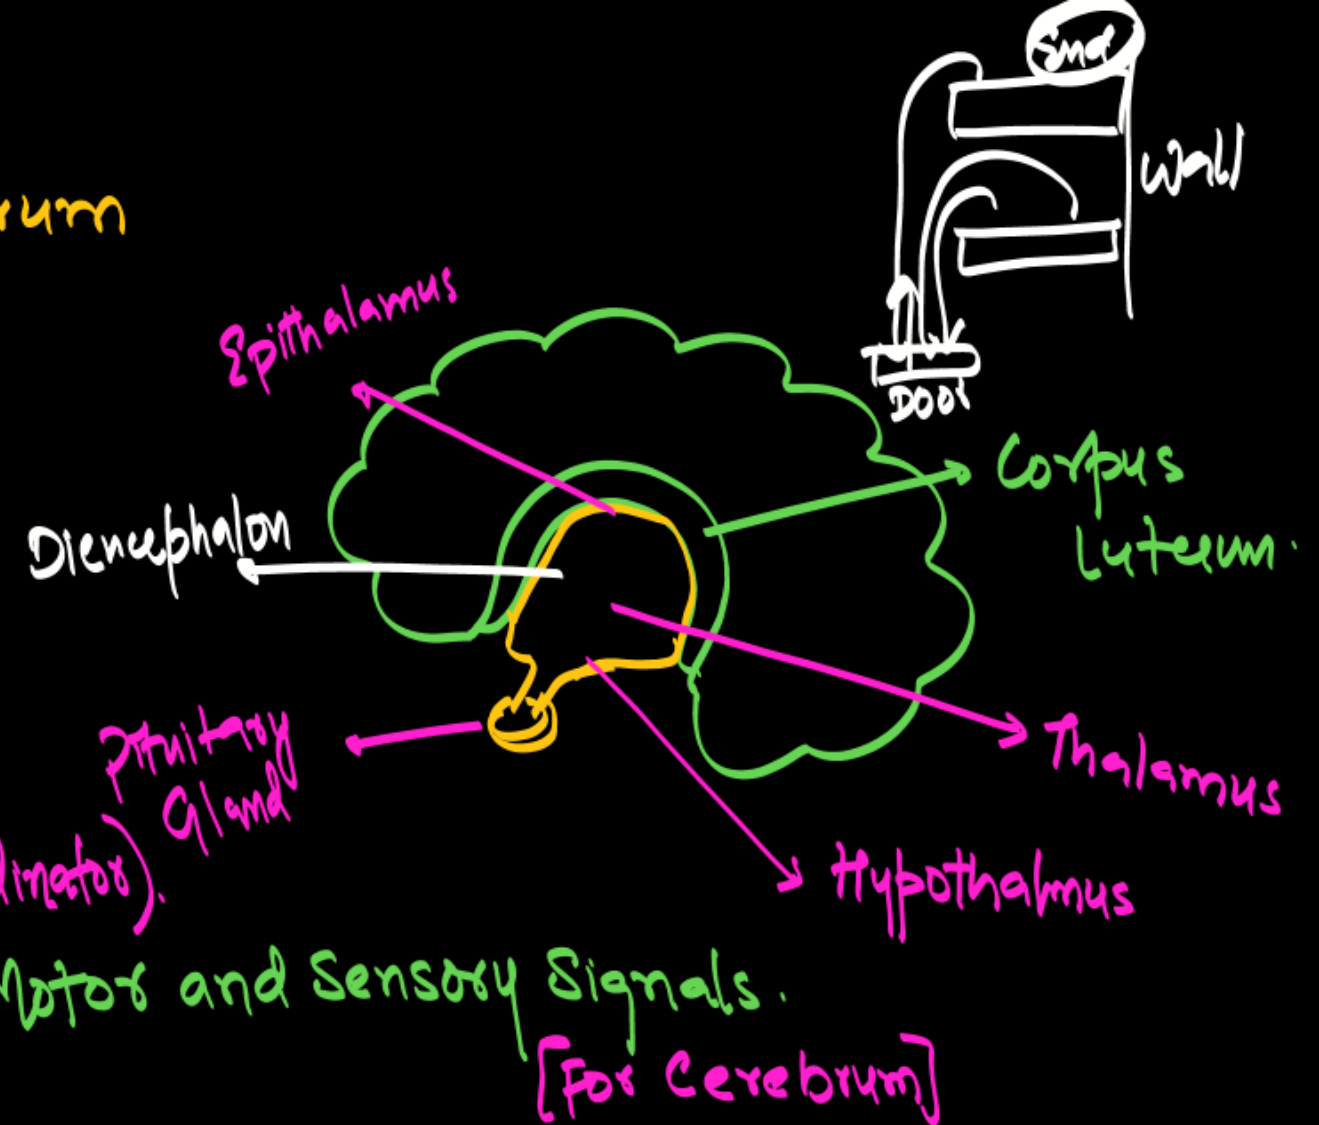

- Floor of " - Hypothalamus

↳ Maintains Homeostasis - Constant Internal Environment.

↳ like Maintains Temperature, osmolarity, HR, Blood pressure.

↳ Also has Hunger, thirst Centre, Reward Centre.

↳ Also controls Pituitary gland.

③ Limbic System

↳ Formed of Amygdala, Hippocampus, part of Hypothalamus etc.

↳ Also k/as Emotional Brain.

↳ one of the oldest part of Brain.

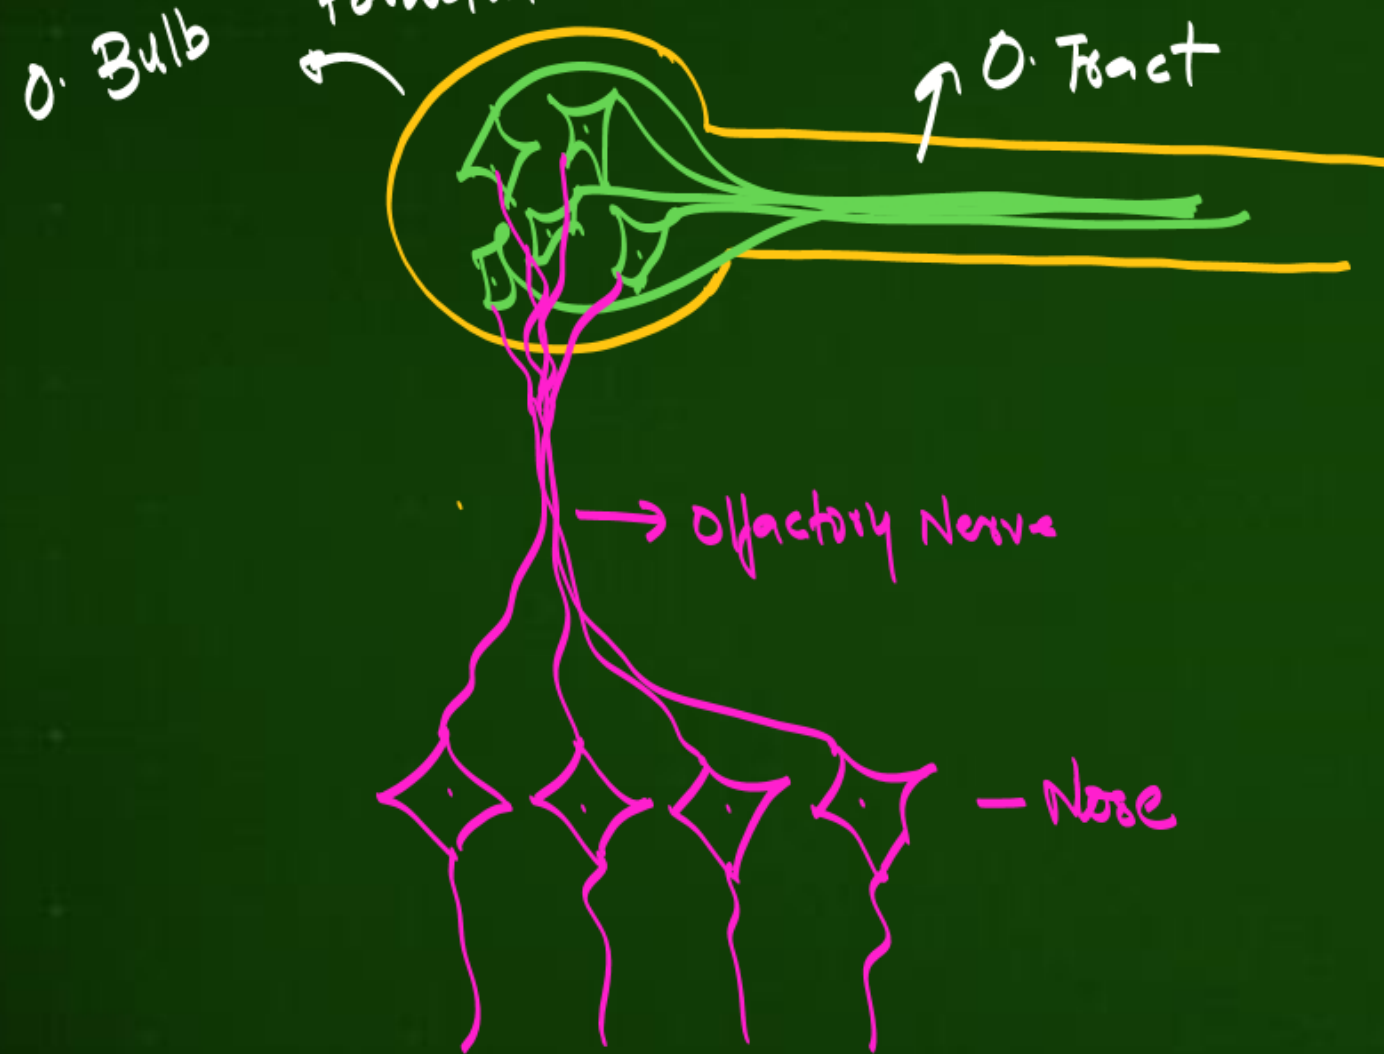

↳ It Controls — Sexual Behaviour.

— Expressions of Emotions (Rage, excitement, pleasure etc).

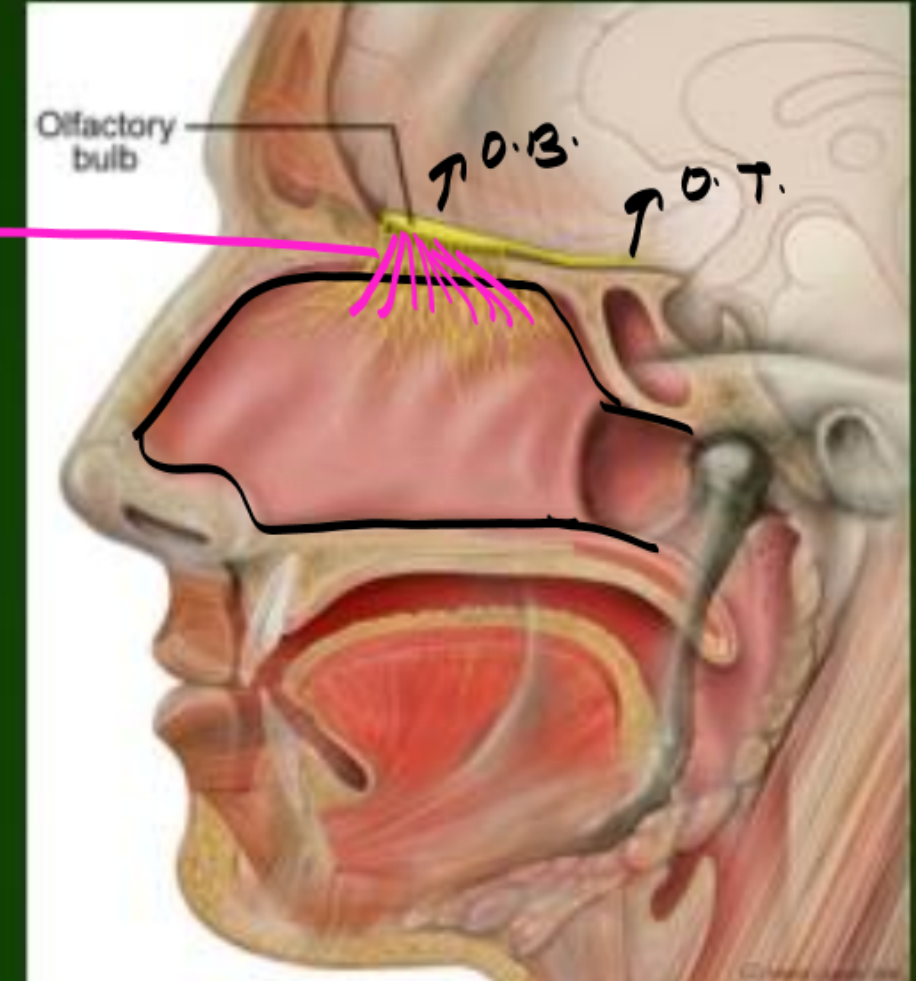

— Motivation.

④ Olfactory Lobes

- Paired Structure, Containing O. Bulb, O. Tract.
- Receives olfactory nerve and Sends Information Forward.

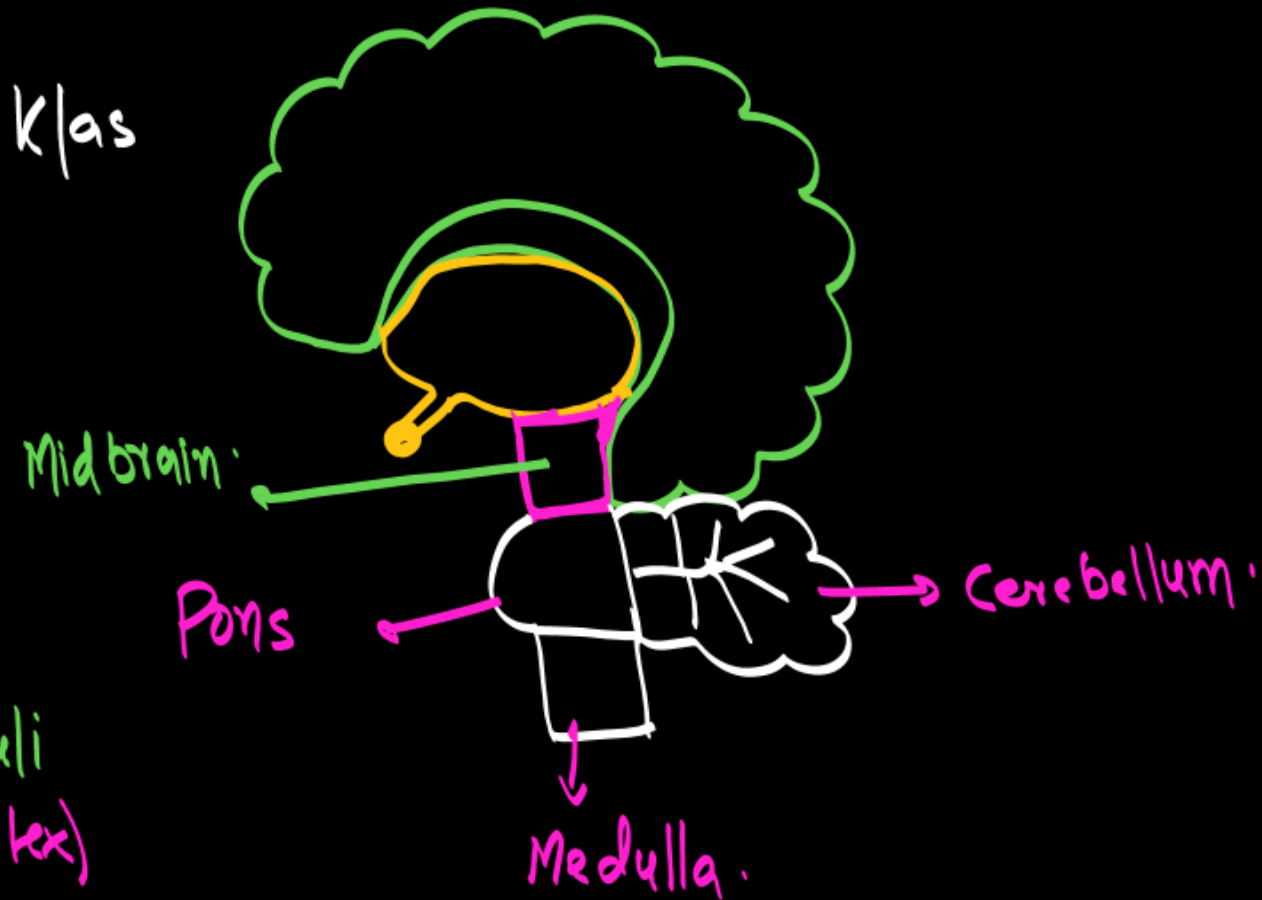

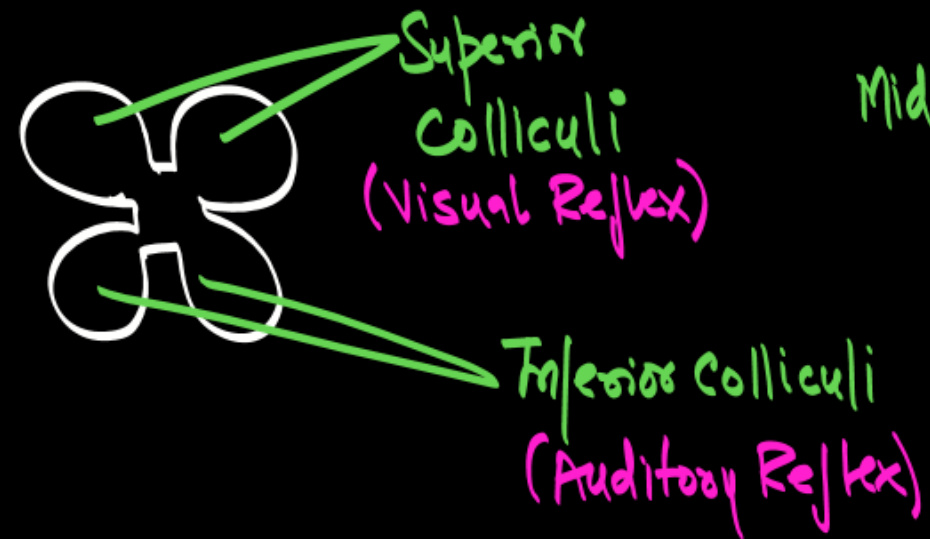

Olfactory Nerve
[Sensory Nerve]

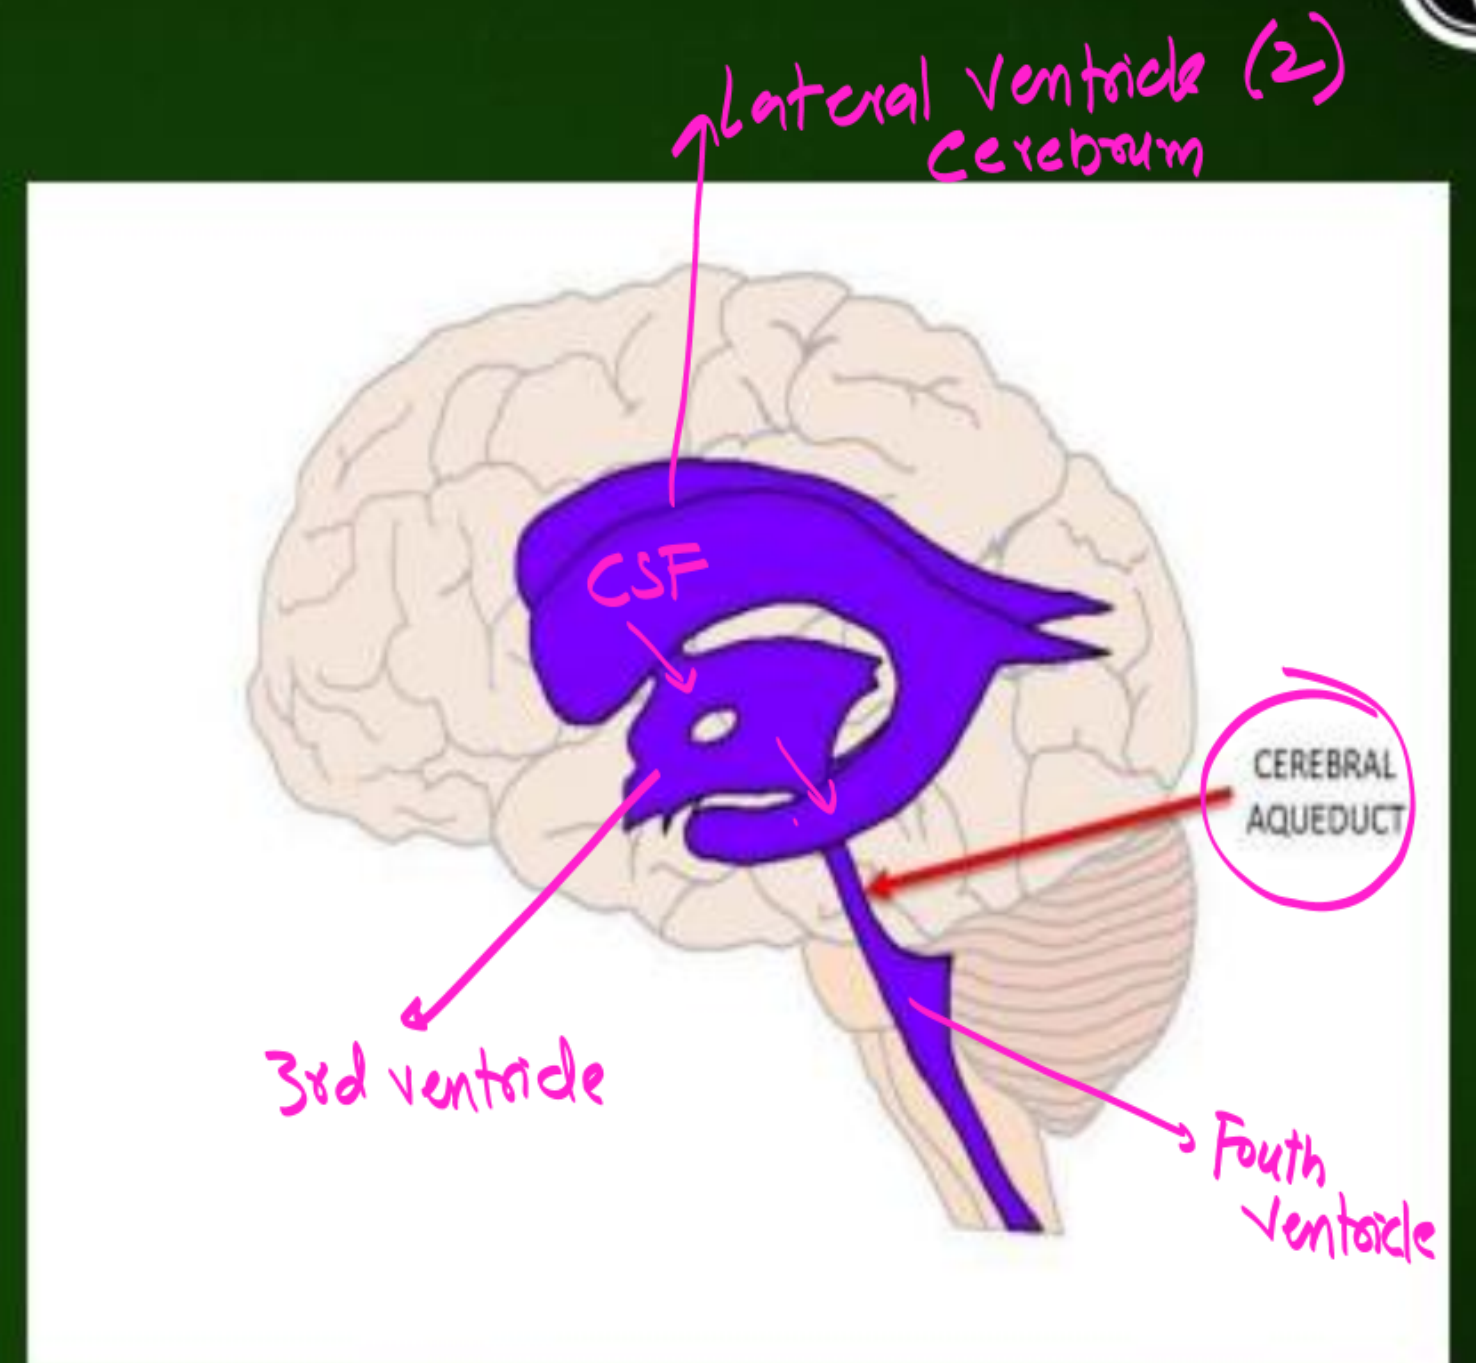

Mid brain

- It is a part located between thalamus/hypothalamus of Forebrain and pons of Hind Brain.
- It has four Round Structures k/as Corpora quadrigemina.

- Through Mid brain, Cerebral Aqueduct Also Passes.

Hind Brain

(i) Pons

- Pons Means Bridge.
- It has Tracts (group of Fibres/Axon) to connect various Brain parts.

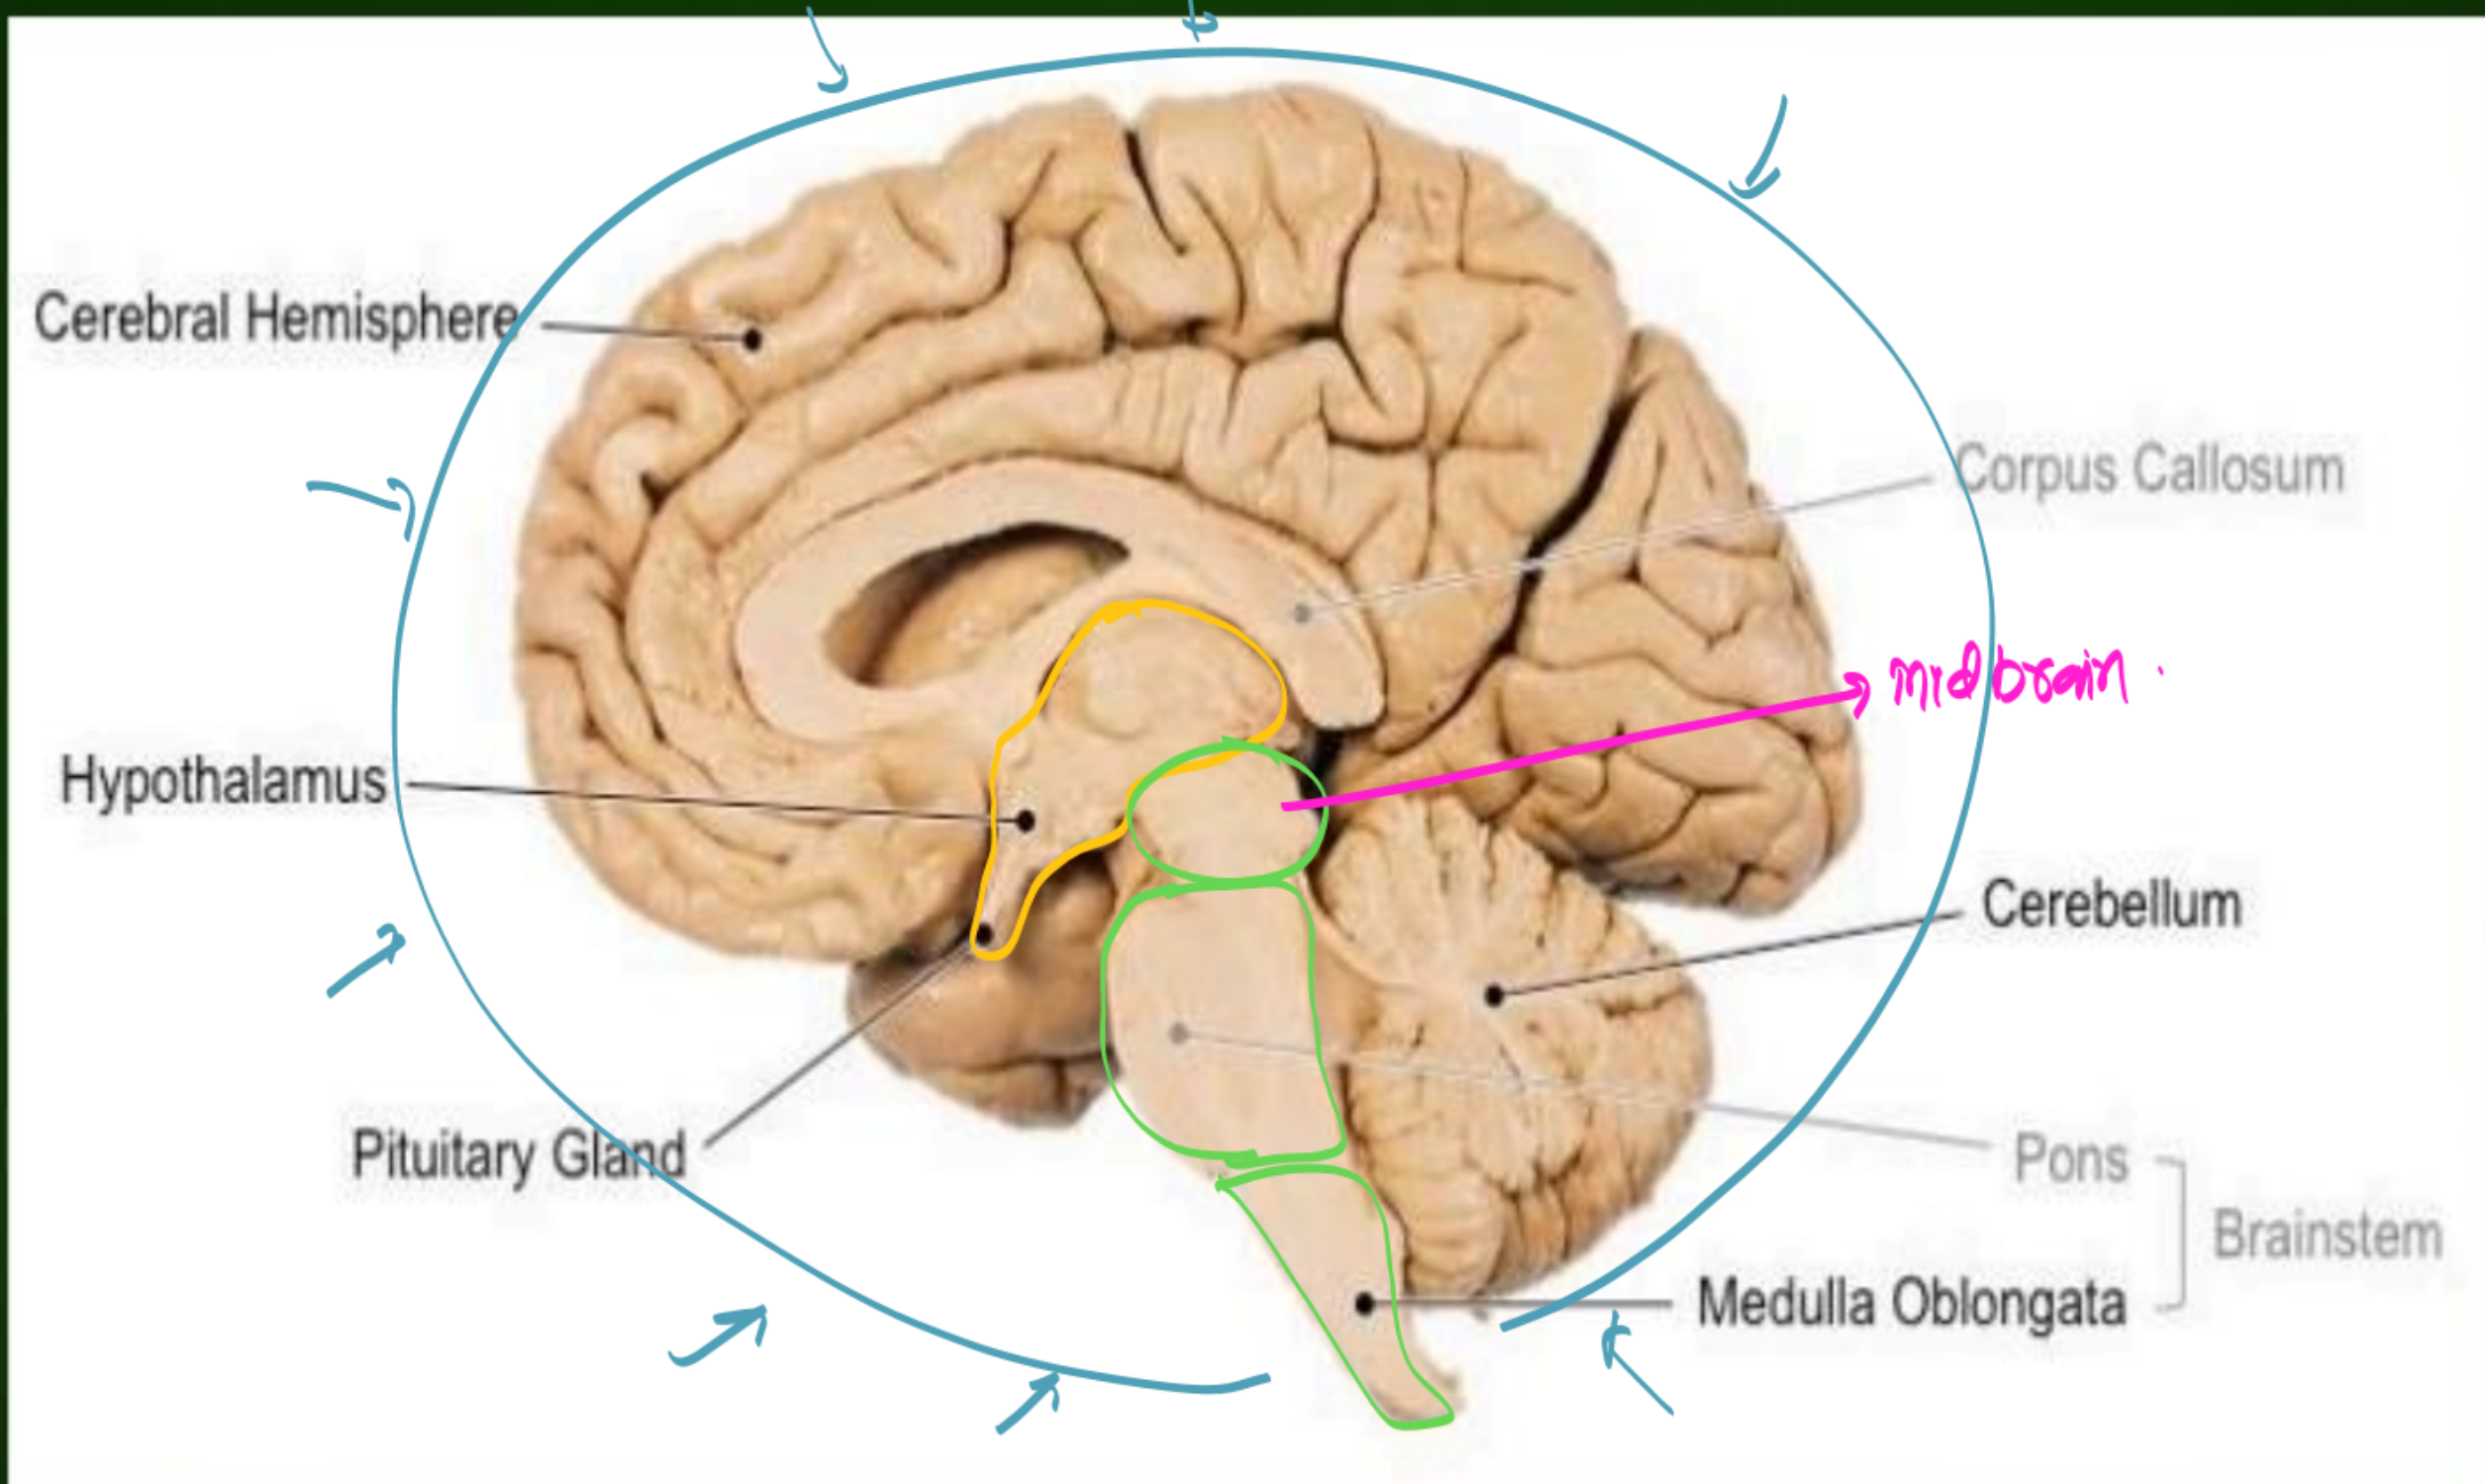

(ii) Medulla

- One of the Safest Part of Brain, containing Important Centres;
 - Cardiac Centre
 - Respiratory Centre
 - Digestive Centre
- Also have Reflex Centres → Swallowing, Cough, Sneezing, Vomiting etc.

(iii) Cerebellum (Gyroscope of Body)

- Literally meaning - Small Cerebrum.
- Largest part of Hind Brain.
- It also have two hemisphere, have Sulci & gyri, have Grey Matter and white matter.
- But here same side of hemisphere controls same side of Body.
- White Matter is present in the form of Tree like Arbor Vitae (Vital Tree of Life).
- Function - It helps in Maintaining Balance while coordinating with cerebral Activities, like walking, Running, Writing, Swimming etc.
 - It is Involuntary and Never Starts voluntary Function.

HOMework

↳ Aaj koi Home work Nahi

All the Best to Every Student of BAAZ 1.0,
It was really a nice journey with you people,
I wish, pray and Hope, you people will get
what good and legal things you need in your life.
Thank you. Be nice, kind, positive and Happy because
life is too Short.

Aditya

Thank
You
