

BAAZ & UDAY JKBOSE

2026 CLASS 11TH

STRUCTURAL ORGANISATION IN ANIMALS

LECTURE-2

ZOOLOGY

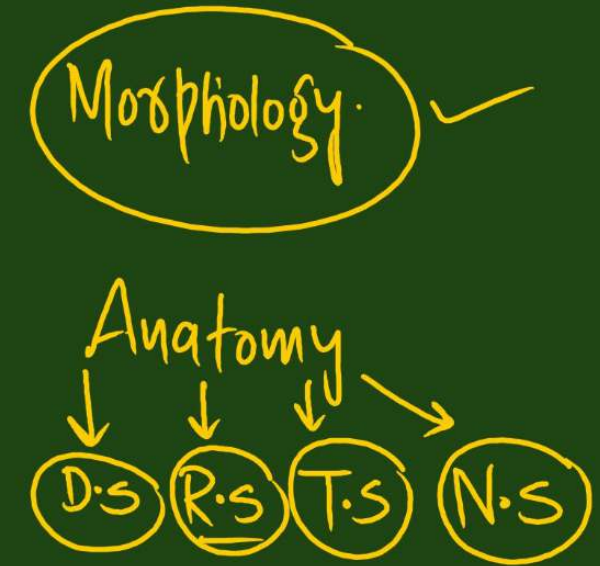

DAVOOD SIR (CEO of NG)

Physics Wallah

Topics To Be Covered

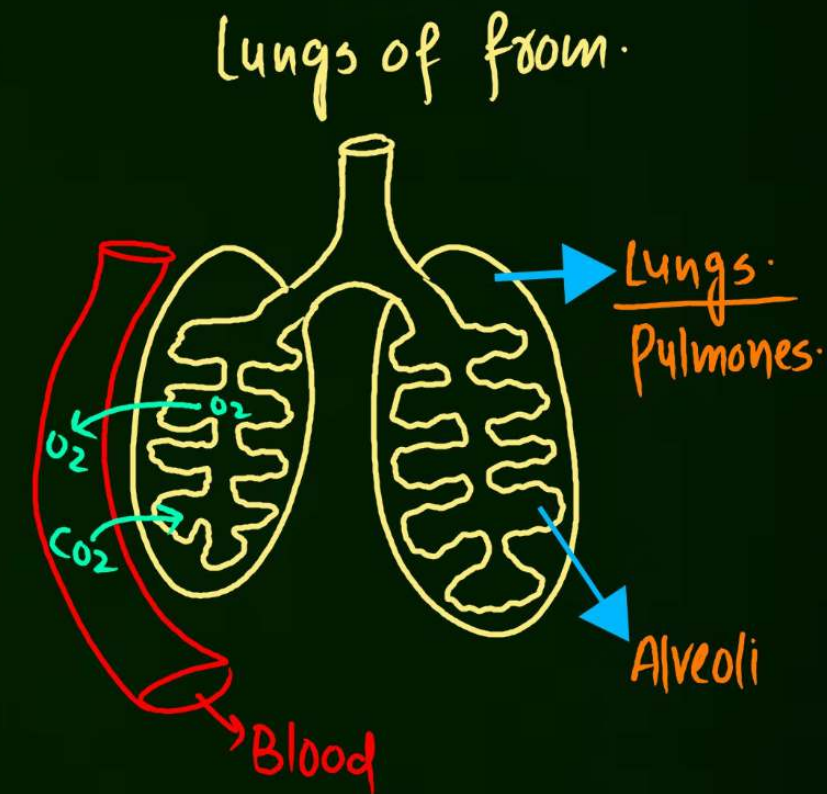

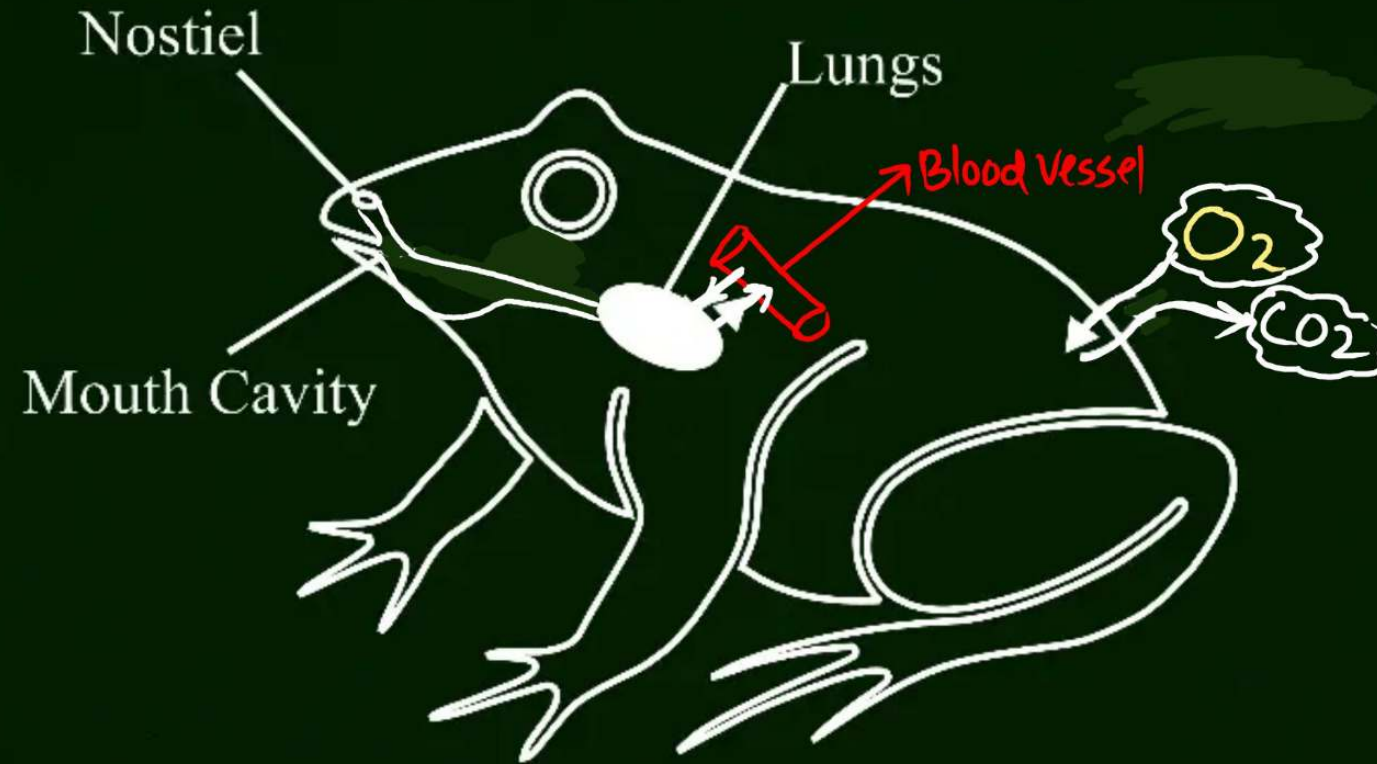

- 1 RESPIRATORY SYSTEM OF A FROG
- 2 TRANSPORTATION SYSTEM OF A FROG
- 3 COORDINATION SYSTEM OF A FROG
- 4 PREVIOUS YEAR NEET MCQ'S

Respiration in a Frog

Frogs use two different respiratory methods: aquatic and terrestrial.

- a) In water:-Cutaneous Respiration(Skin Respiration) by diffusion.
- b) On land:-Skin, buccopharyngeal & lung(Pulmonary Respiration)

Lungs:- Elongated, Pink, sac like structures in thorax, Air Enters in Nostrils then Buccal Cavity then in lungs.

During aestivation and hibernation:- Skin Respiration/Cutaneous Respiration

Question: NEET-2025

Frogs respire in water by skin & buccal cavity & on land by skin, buccal cavity & lungs.

Choose the correct answer from the following:

- A** The statement is true for both the environments
- B** The statement is false for water but true for land.
- C** The statement is false for both the environment
- D** The statement is true for water but false for land

Question: PYQ-2025

In frog, oxygen dissolved in water can be taken by

A External nares

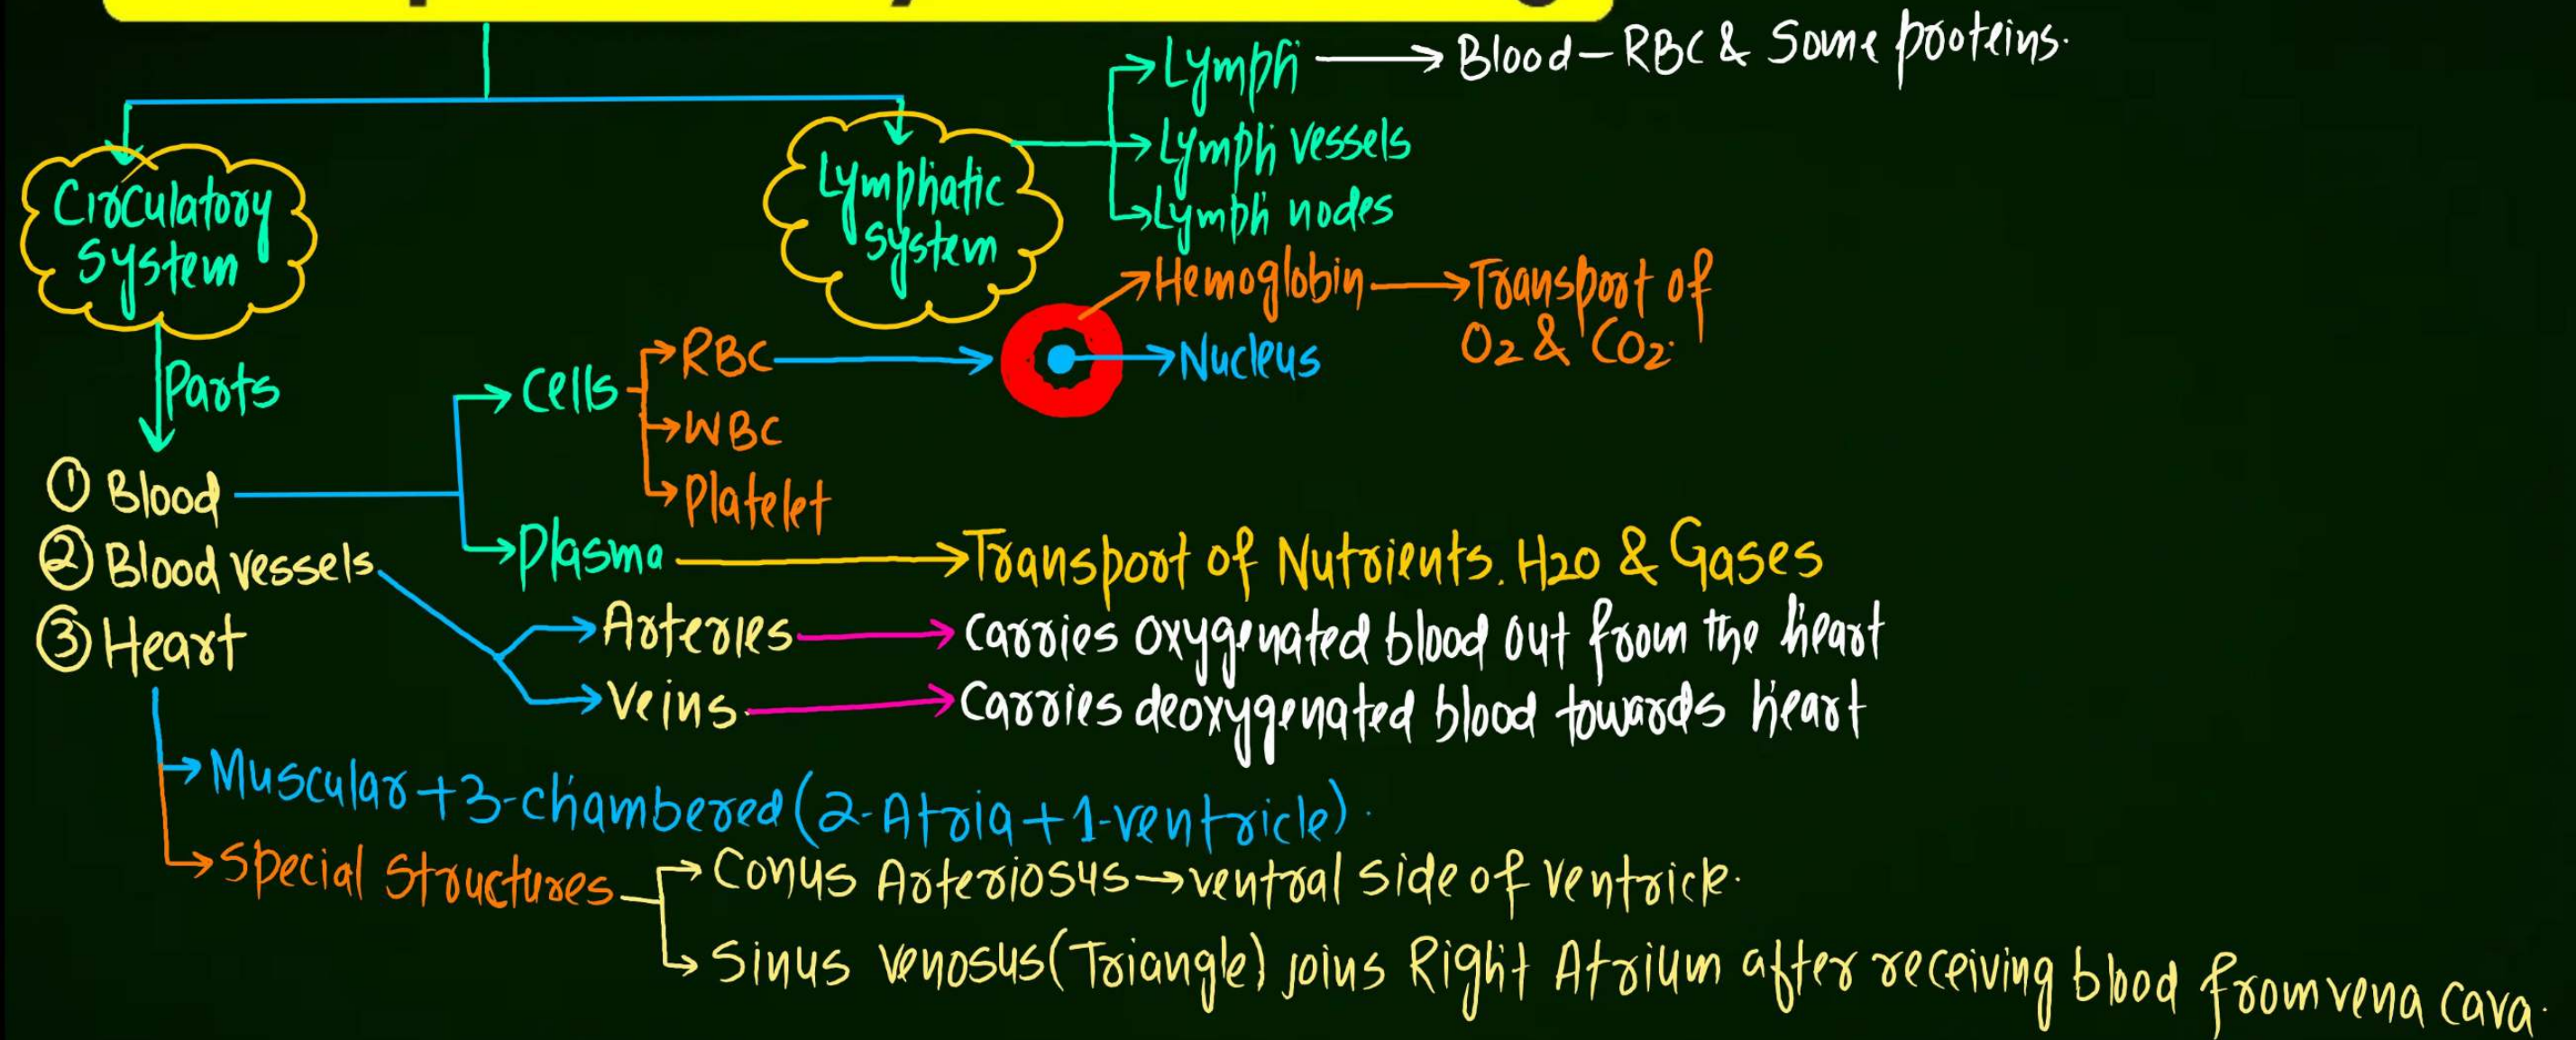

B Spiracles

C Buccal cavity

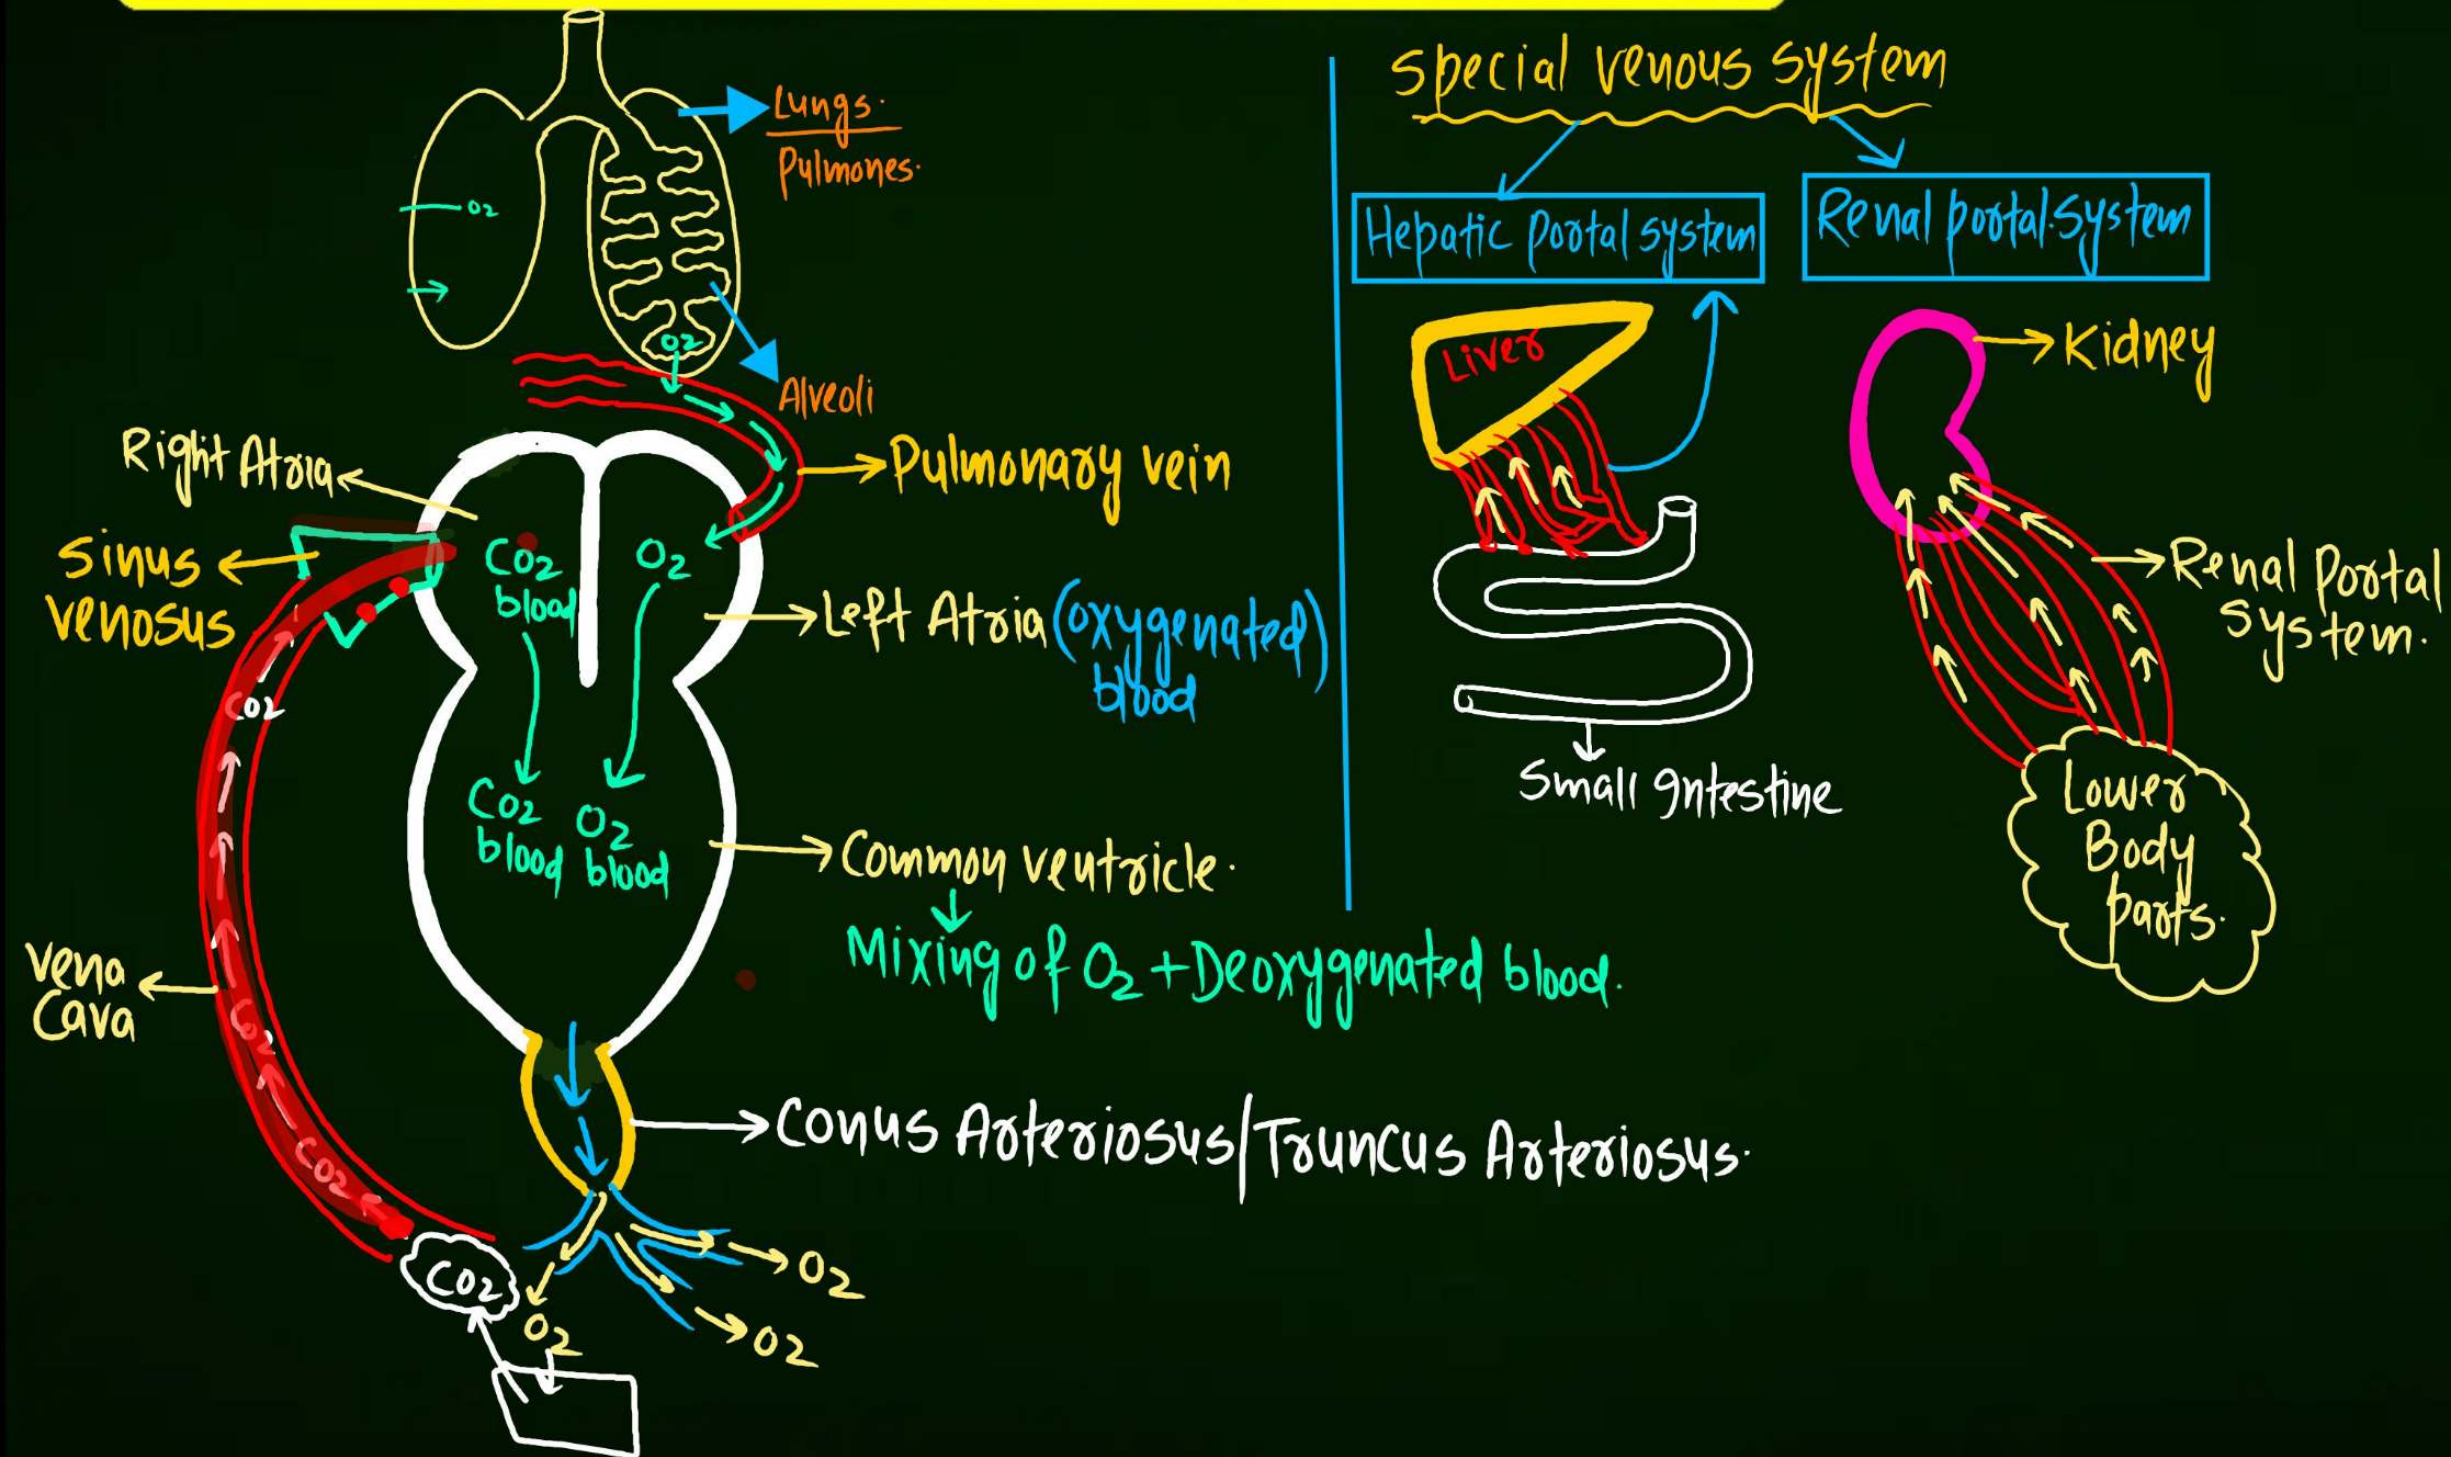

D Skin

Transportation system of a Frog

Transportation system of a Frog

Question: NEET-2025

What is the name of the blood vessel that carries dexygenated blood from the body to the heart in a frog:

A Pulmonary artery ✗

B Pulmonary vein ✗

C Vena cava. ✓

D Aorta ✗

Thank
You
