

BAAZ & UDAY JKBOSE

2026 CLASS 11TH

STRUCTURAL ORGANISATION IN ANIMALS

LECTURE-3

ZOOLOGY

DAVOOD SIR (CEO of NG)

Physics Wallah

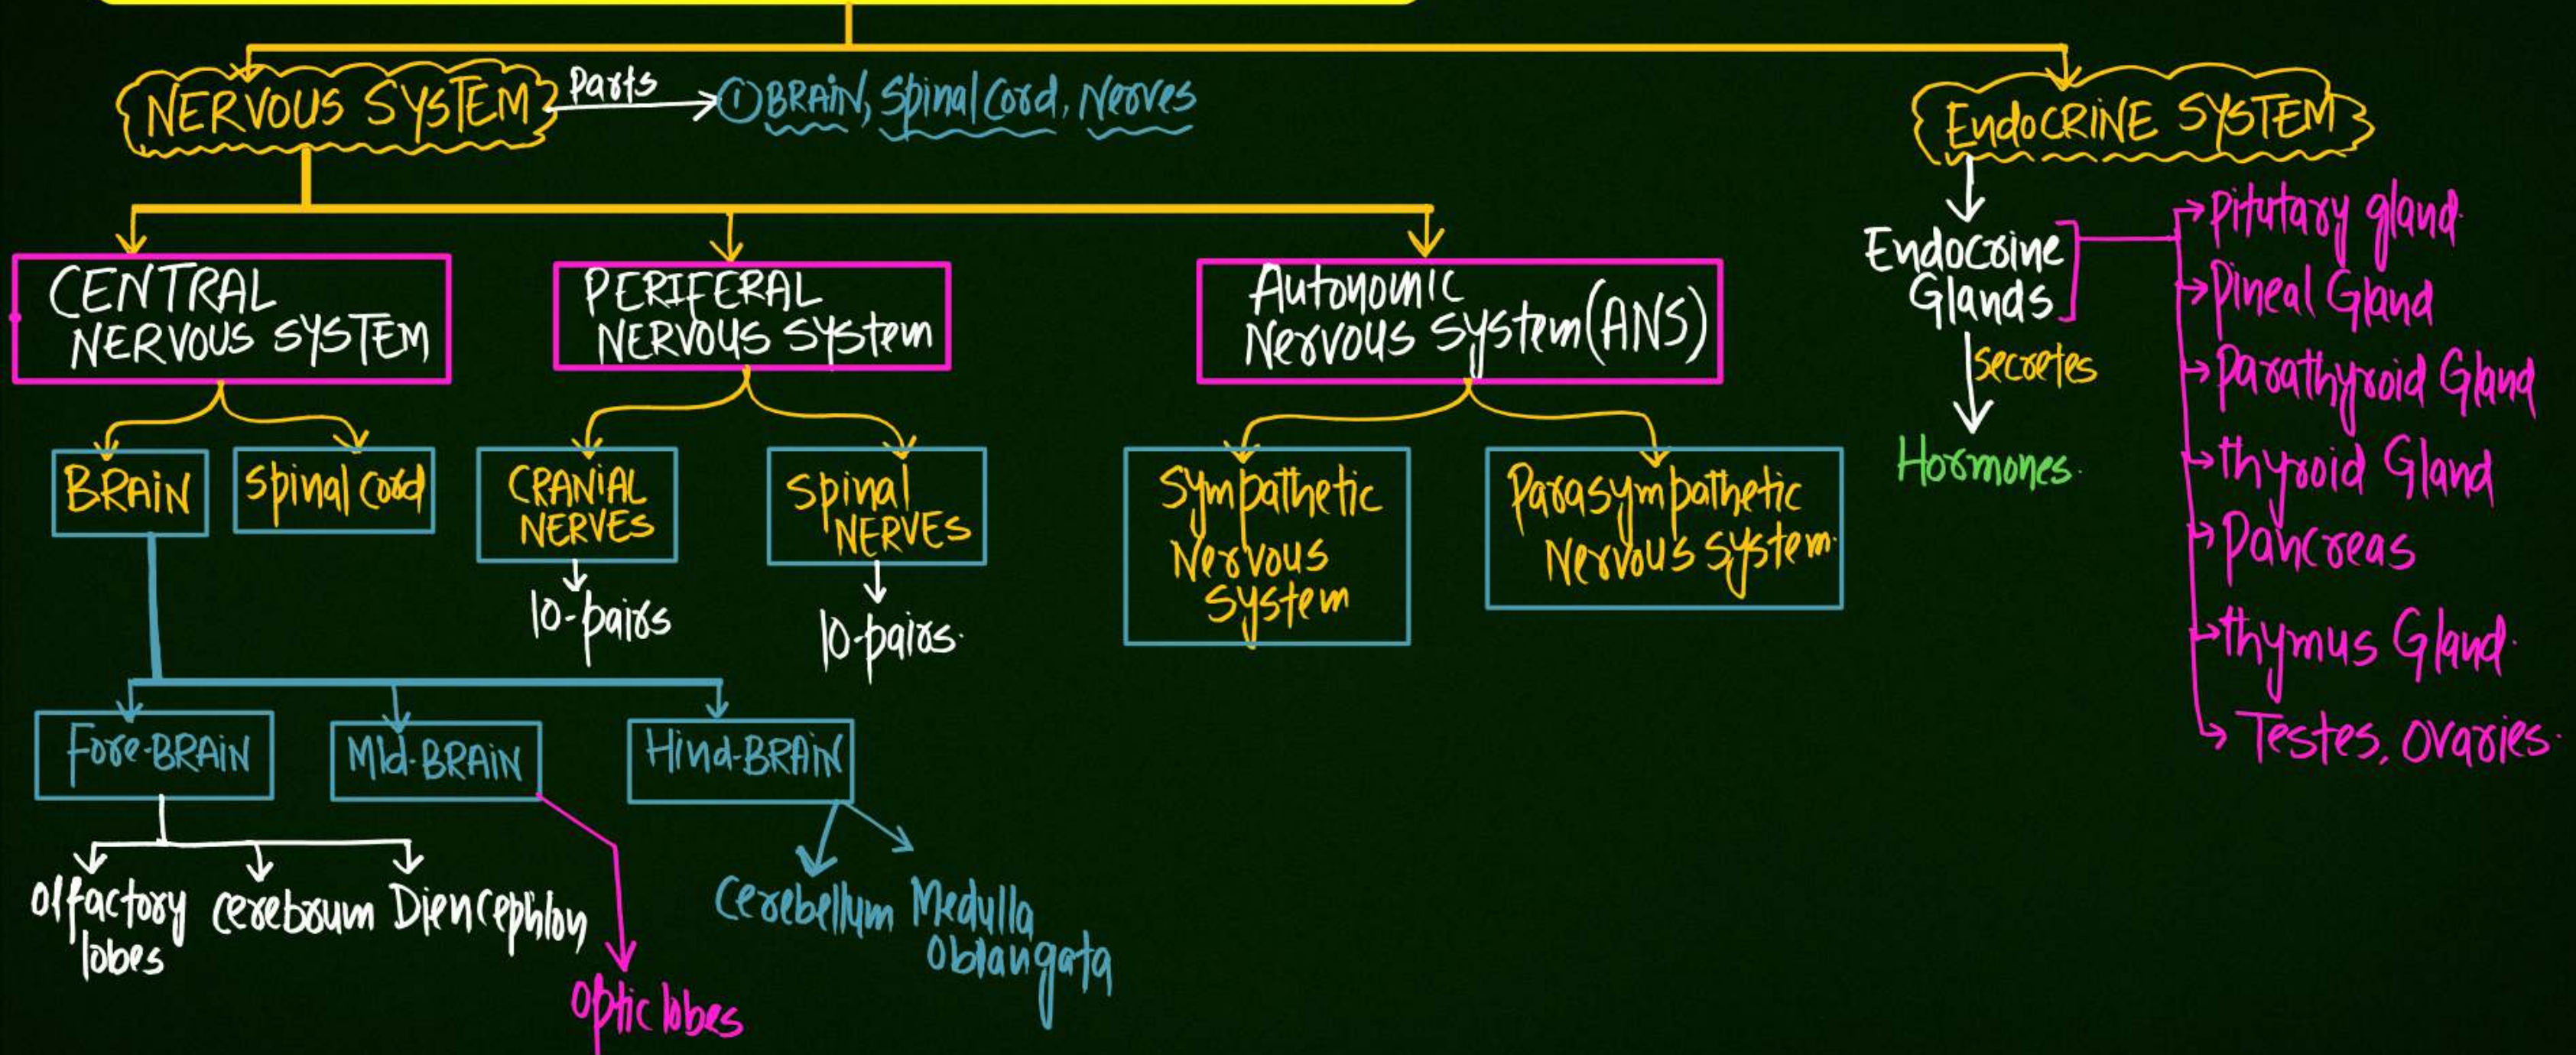

Topics To Be Covered

- 1 **COORDINATION SYSTEM OF A FROG**
- 2 **EXCRETORY SYSTEM OF A FROG**
- 3 **REPRODUCTIVE SYSTEM OF A FROG**
- 4 **PREVIOUS YEAR NEET MCQ'S**

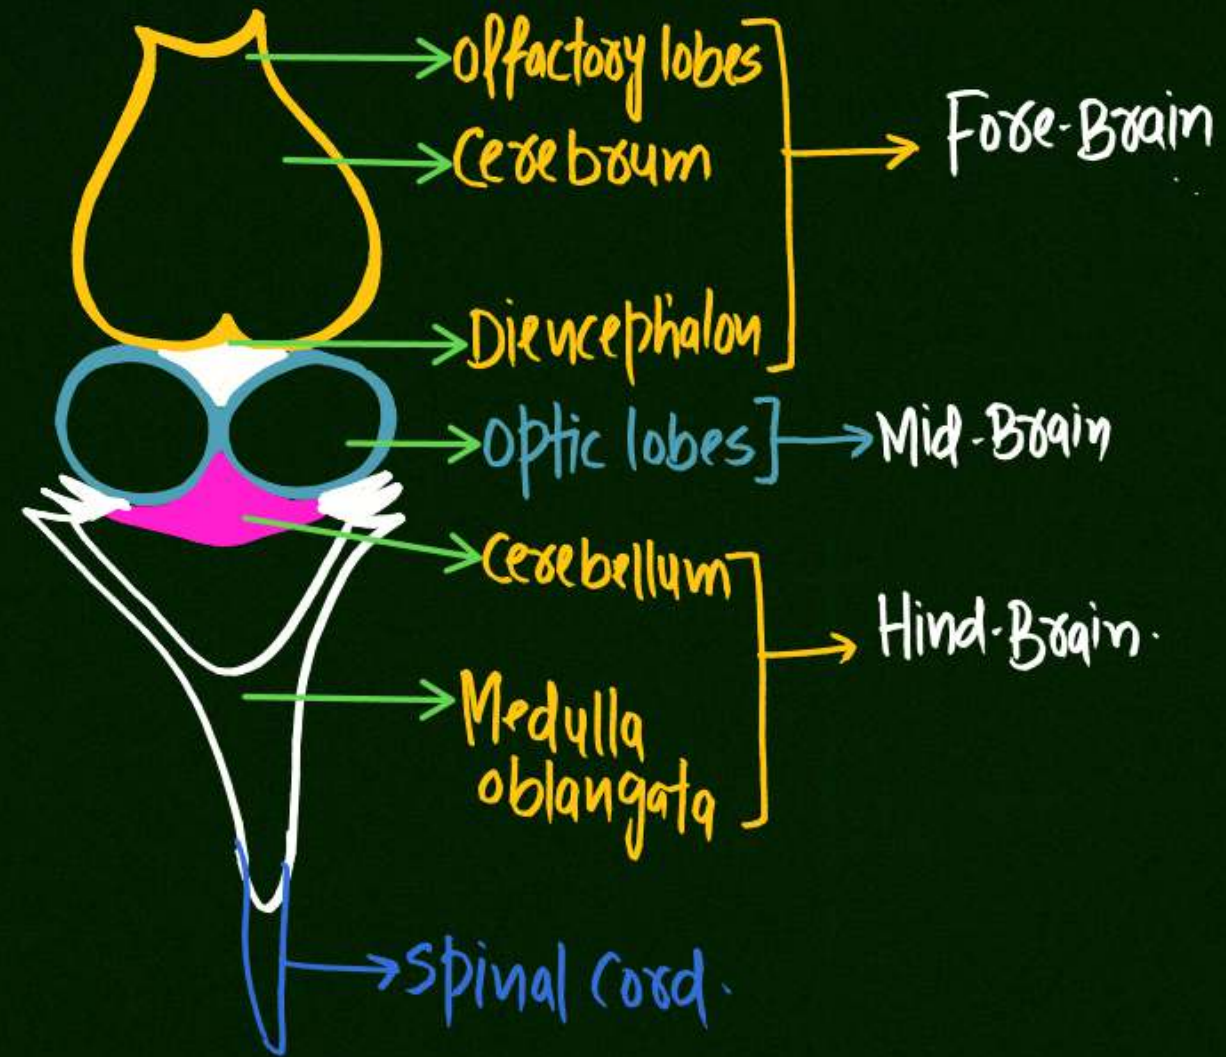

Morphology ✓

Anatomy
(D.S) (R.S) (T.S)

Coordination system of a Frog

Coordination system of a Frog

Coordination system of a Frog

Frog has different sense organs and they are named as:

- ① For Touch → Sensory papillae
 - ② For Taste → Taste Buds
 - ③ For Smell → Nasal Epithelium
 - ④ For Vision → Eyes
 - ⑤ For Hearing → Tympanum with internal ear.
- these are cell aggregation
- these two are well developed organs
- ↓
Also for Balancing.

Coordination system of a Frog

- ✓ Frog's control & coordination system includes **endocrine glands** and **nervous system**.
- ✓ **Major endocrine glands:** pineal body, pituitary, thyroid, parathyroid, thymus, pancreatic islets, adrenals, gonads.
- ✓ **Nervous system parts:**
 - (a). Central nervous system which includes brain and spinal cord.
 - (b). Peripheral nervous system which includes cranial and spinal nerves.

Coordination system of a Frog

Autonomic nervous system.

- ✓ Ten pairs of cranial nerves & ten pairs of spinal nerves are present in a frog.
- ✓ Brain enclosed in cranium (brain box) and is divided into three parts:
 - a) **Forebrain** which includes olfactory lobes, cerebral hemispheres, diencephalon.
 - b) **Midbrain** which includes optic lobes.
 - c) **Hindbrain** which includes cerebellum, medulla oblongata.
- ✓ Medulla oblongata passes out through the Foramen magnum and continues into **spinal cord**, enclosed by vertebral column.
- ✓ Frogs have 5 Sense organs which include:
 - a) Touch (**sensory papillae**)
 - b) Taste (**taste buds**)
 - c) Smell (**nasal epithelium**)
 - d) Vision (**Simple eyes**)
 - e) Hearing (**tympanum**)

Thank
You
