

BAAZ & UDAY JKBOSE

2026 CLASS 11TH

ANIMAL KINGDOM

LECTURE-10

ZOOLOGY

DAVOOD SIR (CEO of NG)

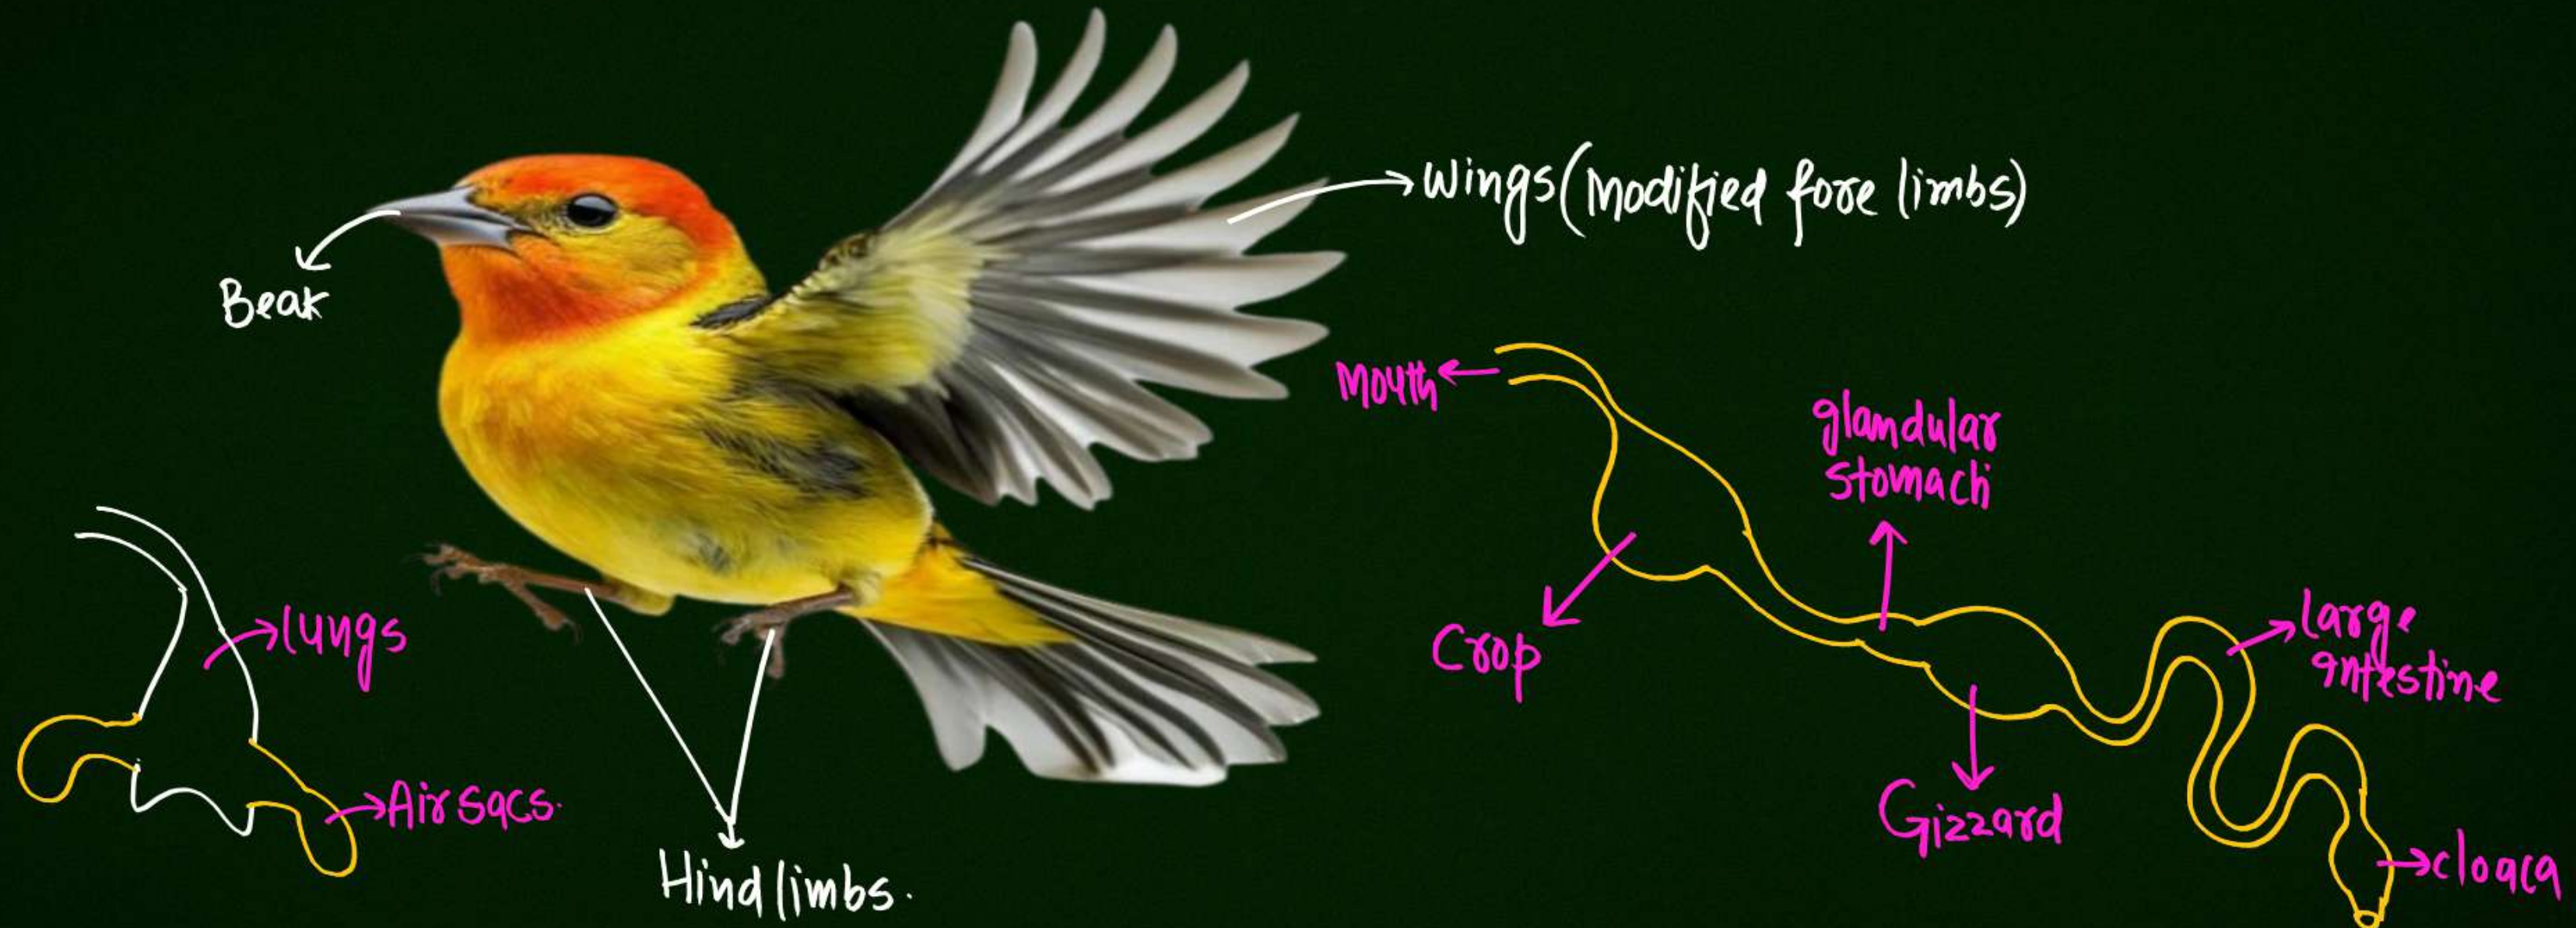

Physics Wallah

Topics To Be Covered

- 1 **Class Aves**
- 2 **Class Mammalia**
- 3 **Previous Year NEET MCQ's**
- 4 **ANIMAL KINGDOM NEET TRICK** →

Class Aves (Birds)

Class Aves (Birds)

Habitat:- Terrestrial (Aerial)

Body Design:

- ↳ Have feathers & Beak without teeth. They mostly fly except Ostrich & Penguin.
- ↳ Fore limbs are modified into wings and hind limbs have scales and are used for walking + clasp + swimming.
- ↳ Skin is dry due to lack of oil glands except Tail region → oily skin.

Endoskeleton:- Fully ossified (Bony). Bones are lightweight and hollow with air cavities (Pneumatic Bones).

Digestive system:- Have Extra two parts viz: Crop & Gizzard.

Heart:- 4-chambered heart + Homeothermic (warm blooded).

Respiration:- By lungs with air sacs for efficient breathing.

Reproduction:- Diecious + internal fertilization & oviparous + Direct development.

Examples:

- *Corvus* (Crow), *Columba* (Pigeon), *Psittacula* (Parrot),
- *Struthio* (Ostrich), *Pavo* (Peacock),
- *Aptenodytes* (Penguin), *Neophron* (Vulture)

Class Mammalia (Milk Producing)

Habitat:- All types of Habitat like polar areas + Deserts + Forests + Caves + Even H₂O.

Unique Features:-

↳ Having mammary glands (Breasts) for milk production for nourishing their young ones.

↳ Hair on skin for insulation.

↳ Ear pinna is present

↳ Teeth are present and are Heterodont (different types) and thecodont (Embedded in jaw bone).

Locomotion: two pair of limbs for walking, climbing, borrowing, swimming.

Heart: 4-chambered heart + Homeothermic + Lung Respiration.

Reproduction:- Dioecious + internal fertilization + viviparous + Direct development.

Examples:

Oviparous (Egg-laying): *Ornithorhynchus (Platypus)*,

Viviparous (Young-born):

Macropus (Kangaroo), *Pteropus (Flying fox)*, *Camelus (Camel)*, *Macaca (Monkey)*, *Rattus (Rat)*, *Canis (Dog)*, *Felis (Cat)*, *Elephas (Elephant)*, *Equus (Horse)*

Delphinus (Dolphin), *Balaenoptera (Blue whale)*, *Panthera tigris (Tiger)*, *Panthera leo (Lion)*

Kaun Banayga Nabkaar NEET-2023

The unique mammalian characteristics are:

- ☒ **A** Hairs, pinna and indirect development
- ☒ **B** Pinna, monocondylic skull and mammary glands
- ☒ **C** Hairs, tympanic membrane and mammary glands
- ☒ **D** Hairs, pinna and mammary glands.

Kaun Banayga Nabkaar [NEET-2023]

Select the correct statements with reference to chordates.

- ✗ A. Presence of a mid-dorsal, solid and double nerve cord. F
- B. Presence of closed circulatory system. T
- C. Presence of paired pharyngeal gill slits T
- ✗ D. Presence of dorsal heart F
- ✗ E. Triploblastic pseudocoelomate animals. F

Choose the correct answer from the options given below:

- ✗ A B, D and E only
- ✗ B C, D and E only
- ✗ C A, C and D only
- D B and C only. ✓

Animal Kingdom (Trick) for NEET (12 marks)

Phylum

Unique Character

Important Examples

Porifera	Canal system with ostia and osculum; choanocytes (collar cells) present	Sycon, Spongilla, Euspongia
Cnidaria (Coelenterata)	Cnidoblasts / nematocysts (stinging cells).	Hydra, Aurelia, Adamsia
Ctenophora	Comb plates for locomotion & have bioluminescence	Pleurobrachia, Ctenoplanea
Platyhelminthes	Flame cells for excretion & have Hooks & suckers	Planaria, Taenia, Fasciola
Nematoda (Aschelminthes)	Pseudocoelomates; complete digestive tract with muscular pharynx & have Excretory pore for excretion,	Ascaris, Wuchereria
Annelida	Metameric segmentation, Nephridia for Excretion.	Earthworm, Nereis, Leech
Arthropoda	Jointed appendages; chitinous exoskeleton, Malpighian tubules for excretion.	Cockroach, Prawn, Honey bee
Mollusca	Mantle, muscular foot, radula	Pila, Octopus, Unio
Echinodermata	Water vascular system; adults radially symmetrical	Starfish, Sea urchin
Hemichordata	Stomochord present (not true notochord)	Balanoglossus
Chordata	Notochord, dorsal hollow nerve cord, pharyngeal gill slits	Fish, Amphibians, Birds, Mammals
